

Improvement Activities

The Improvement Activities Performance Category is a new concept introduced by MIPS reporting that rewards eligible clinicians for participating in activities related to their patient population. Eligible clinicians can select from 92 different activities to earn credit, all designed to improve quality of care. The Improvement Activities Performance Category is worth 15% of the MIPS Composite Performance Score in 2017.

1 Determine how many points are needed for successful reporting

40
POINTS

The standard number of required points and the maximum score for this Performance Category.

10
POINTS

The minimum point requirement, which result in no penalty or incentive.

20
POINTS

For small or rural practices, HPSAs, or non-patient facing clinicians/groups.

0
POINTS

Certified Patient Centered Medical Homes receive full credit automatically.

10 Select from 92 activities to achieve the desired level of credit
