

# MIPS PRO™

## Experience you can trust.

Healthmonix has been a CMS-qualified registry since 2009 and enables streamlined quality reporting for thousands of healthcare providers. Our unparalleled success rate, industry leading solutions, and world class support have placed Healthmonix as the one of the largest CMS registries in the United States.

### Multi-EHR Support

Tap into our integration network to import healthcare data from your EHR or RCM software with ease.

### Adapt To Your Context

Identifies your best performing MIPS measures to submit as a group or individual.

### Data Validation & Support

Our team assists with the reporting process from end to end. We know MIPS so you don't have to.

### All MIPS Categories

Real-time dashboards let you track Quality, PI, IA, and Cost in one convenient location.

### Know Your Score

Manage your MIPS score in real time to close gaps in patient care, and catch common errors that artificially reduce scores.

### Workflow Consulting

Expert assistance to help you streamline data collection and maximize your ROI for QPP participation.

### Clinical Coaching

Peer-to-peer guidance, coaching from physician experts, and implementation support.

### Chronic Care Management

Close gaps in care (and MIPS performance) with a fully managed care coordination program for your patients.
