OneStream Software Debuts Fish Market Solution Center

ROCHESTER, MICHIGAN (February, 2015) - OneStream Software LLC, leader in Corporate Performance Management (CPM) software, today announced the successful debut of its Fish Market Solution Center.

The Fish Market is a customer self-serve solution center for OneStream XF clients. This highly anticipated download center delivers immediate access to OneStream's growing list of pre-built solutions, templates, accelerators and workspaces that can be added directly to their OneStream application from a single location. Users can easily download and customize a solution specific to their needs, all with a click of a button. All downloadable applications can be previewed and come with complete documentation and simple setup instructions. In addition to its customizable solutions, the Fish Market Center will also contain training videos highlighting different features in short easy to understand sessions.

"The OneStream Fish Market will revolutionize the financial software industry as we know it. The Fish Market gives OneStream a speed to market advantage that no other vendor can compete with." says Craig Colby, Sr. Vice President Business Development, OneStream Software. "Each Fish Market solution has a proven design that has been built and thoroughly tested in-house. No third-party application is required. Customers want customizable solutions, such as, specialty planning solutions for CAPEX and People planning, fast and easy report delivery, close management, and user specific pre-defined dashboards. Our Fish Market delivers these additional solutions, and more, with unparalleled speed and flexibility adapted to the unique requirements of every organization"

There is very little or no setup to the majority of solutions. Examples of Fish Market Solutions include:

- Close Manager
- Workforce Planning
- Guided Reporting with automatic report distribution
- Video Training
- User Help Desk
- Certified Cash Flow Dimension
- Postal Service Automated Report Delivery

Gary Simon, CEO of FSN states "OneStream is a trendsetter in the CPM space. 'Fish Market' reflects the latest thinking in software development in which software vendors literally create a marketplace where customers and partners can buy and sell solutions, benefitting the whole user community with pre-built templates that have common appeal. OneStream acts as the 'gate keeper' for quality and consistency, ensuring that every solution has common instructions and conforms to quality standards prior to release. In this way the community can be assured that pre-built solutions can be downloaded and readily 'wired' into any OneStream application and used within a matter of hours."

About OneStream Software LLC

OneStream Software is a privately held software company created by the same team that invented the leading financial solutions of the last decade. We provide a unified Corporate Performance Management (CPM) platform which enables the enterprise to solve complex financial consolidation, reporting, budgeting and forecasting with powerful extensibility to enable the deployment of additional analytic solutions. By delivering multiple solutions in one application, we offer increased capabilities for financial reporting and analysis while reducing the risk, technical complexity and total cost of ownership for our customers. We stand behind our mission statement that every customer must be a reference and success.
