OneStream Software Breaks into Leader's Quadrant in Latest CPM Value Matrix from Nucleus Research

Breadth of CPM capabilities earns the company one of the top placements for both usability and functionality among the leaders

ROCHESTER, MI– February, 13, 2018 –<u>OneStream Software LLC</u>, a leading provider of on-premise and cloud corporate performance management (CPM) solutions for mid-sized to large enterprises, today announced that they have been named a leader in the 2018 Nucleus Research Technology Value Matrix for corporate performance management (CPM). The Value Matrix is based on functionality and usability, the two core measures that Nucleus has found indicate an application's ability to deliver initial ROI and, ultimately, maximum value over time.

"OneStream's breadth of functionality across strategic and financial CPM processes competes well against top vendors in either of these camps. As such, the product offers a strong alternative to the robustness of on-premise Hyperion (or other legacy product) deployments which span a similar range of functions. On the usability side, customers consistently reported strong vendor support and a positive deployment experience," said Barbara Peck, principal analyst at Nucleus Research.

OneStream Software provides a revolutionary corporate performance management (CPM) solution that unifies and simplifies financial consolidation, planning, reporting, analytics, and financial data quality for sophisticated organizations. Deployed in the cloud or on-premise, OneStream's SmartCPM[™] platform is the first and only solution that delivers corporate standards and controls, with the flexibility for business units to report and plan at additional levels of detail without impacting corporate standards – all through a single application.

"This is our first year being covered by Nucleus Research, and our placement in the leader's quadrant is a testament to the power of our platform and strategy," says Tom Shea, chief executive officer of OneStream Software. "A key measurement of the Nucleus Research Value Matrix is the ability to provide maximum value over time and our SmartCPM platform and XF MarketPlace solution center do just that. Our customers sought a solution that could not only meet their immediate needs in financial reporting or planning but also easily be extended to address additional requirements and deliver even more value."

The OneStream <u>XF MarketPlace</u> has over 40 solutions available for customers to download and easily extend the value of the OneStream XF SmartCPM platform. XF MarketPlace solutions eliminate the noise of technical complexity and allow customers to start solving their business problems from day one. Solutions include People Planning, Capex Planning, Account Reconciliations, Lease Accounting and more.
