

Level 2 Studio

Course Description

This 1-day hands on course covers the OneStream Studio Advanced Report Writer. This class focuses on how to use Studio to apply advanced formatting to Cube Views as well as reports used in MarketPlace Solutions such as People Planning and Reconciliation Control Manager.

Who Should Attend

Only expert administrators who will write reports using Studio and are comfortable with OneStream's report building functionality.

Prerequisites and Advanced Preparation

This is not a class for beginners. Students should have attended the Application Build for Administrators class. As an alternative, the student should have experience working with reports in OneStream and understand how Cube Views and Dashboards are created and used.

Note: This class is taught with exercise material embedded within a PowerPoint file. With the exception of the Rochester location, users will only have one screen to use either on a laptop or monitor. To avoid having to switch back and forth between the internet browser and PowerPoint during class exercises, OneStream recommends bringing a laptop or tablet to training in order to display the PowerPoint file separately.

Registration

Americas Public Classes: Training registration and payment are completed through our online registration system. Payments can be made by credit card, wire transfer, or purchase order. Once registration is complete, you will receive a training confirmation and a receipt.

EMEA Public Classes: Email training@onestreamsoftware.com to make a registration request.

Complaints should be directed to training@onestreamsoftware.com or OneStream Support Portal at 844-663-3474.
