

ONESTREAM

CLASSROOM

Level 2 Financial Model Rules

Course Description

This two-day, hands-on course will discuss the OneStream Finance Engine including Dynamic Calculations, Stored Calculations and Finance Business Rules. It provides guidance on calculation optimization and performance impacts and highlights additional resources available to rule writers.

Who Should Attend

Only expert administrators who will write rules or advanced implementation services professionals should attend.

Prerequisites and Advanced Preparation

Must have attended the Application Build for Administrators or Application Build for Consultants class.

VB.NET skills and knowledge of Object Oriented concepts are required in order to complete the course material. A suggestion for an overview is Channel 9 on MSDN for Bob Tabor's roughly 8 hours of videos on introduction to key concepts available at <https://channel9.msdn.com/Series/Visual-Basic-Fundamentals-for-Absolute-Beginners>. You can also visit Bob Tabor's site at: <https://bobtabor.com/>. Another resource is www.tutorialspoint.com/vb.net/index.htm and www.functionx.com/vb/index.htm.

Note: This class is taught with exercise material embedded within a PowerPoint file. With the exception of the Rochester location, users will only have one screen to use either on a laptop or monitor. **To avoid having to switch back and forth between the Internet browser and PowerPoint during class exercises, OneStream recommends bringing a laptop or tablet to training in order to display the PowerPoint file separately.**

Registration

Training registration and payment are completed through our online registration system via the OneStream University website: www.onestreamsoftware.com/services/training. Payments can be made by credit card or wire transfer. Once registration is complete, you will receive a training confirmation and a receipt.

Complaints should be directed to training@onestreamsoftware.com or OneStream Support Portal at +1 (844) 663-3474.

Class Size

Public classes require a minimum of three students registered within seven days of the class start or they may be canceled at OneStream's discretion. Once the registered class size reaches its limit (*differs by location*), it will be closed to additional students.

Agenda

Day 1

- OneStream Finance Engine
 - Key VB.Net Concepts and Helpers
- Stored Calculation Member Formulas
 - Adding Conditions and Filtering
 - Flow Calculations

Day 2

- Advanced Stored Calculations
 - Evals and Data Buffers
 - Remove Functions
