

Technology to Enable Safer Memory Care

SafelyYou Consulting Service | Fall Program Assessment

Through the use of advanced AI fall detection technology and video review, SafelyYou has gained unparalleled insight into caregiver response to fall events. Our detailed fall program assessment provides community leaders with the knowledge necessary to reduce risks and promote cultural change. Below will be the areas of focus:

- **Fall Analysis:** Data review of existing incident reports for past 12 months to find trends in time of day, frequency of falls, or type of falls
- **Policies & Procedures:** Determine the efficacy of community-specific policies and procedures related to falls
- **Training Programs:** Examine the suitability of current transfer techniques and ensure all trainings utilize current transfer aids within the community
- **Process Review:** Identify opportunities to incorporate quality assurance through a series of checklists including a family move-in guide, comprehensive fall scene investigation, environment sweeps, fall huddles.
- **Incident Documentation:** Uncover data gaps to ensure fall incident reporting contains valuable data to be able find trends and opportunities for interventions

The assessment will involve a series of conference calls and documentation review. The deliverable will include a detailed report of the fall analysis, opportunities and recommendations on how the organization can elevate their current fall program.
