# Orthopedic Services

## Orthopedic Services

Bone and joint conditions make even simple activities a challenge. At Lane Regional, our orthopedics department provides a complete range of diagnostic and treatment services for patients with musculoskeletal conditions. Each is designed to get you back on your feet and enjoying a pain-free, active lifestyle in as little time as possible.

## Comprehensive Approach

We use a comprehensive approach to prevention, assessment, treatment and rehabilitation that includes:

- Precise evaluation and diagnosis of your situation using the latest digital imaging tools;
- Customized treatment plans;
- An innovative combination of rehabilitation therapies and medically supervised fitness training;
- Support for your rehabilitation and recovery with appropriate pain management strategies;
- Advanced technology and expert care.

## Compassionate Care

At Lane Regional, we treat each patient like family. Our compassionate, dedicated team of doctors, nurses, therapists and other healthcare professionals carefully attends to your needs and concerns, enabling you to focus your energy on recovery and rehabilitation.

## Latest Advanced Imaging Technology

The advanced imaging capabilities at Lane Regional include High Field Magnetic Resonance Imaging (MRI), Direct Digital Radiograph (X-Ray), and Multi-Slice Computed Tomography (CT) scanning, which means your doctors can pinpoint damage to bones, joints and soft tissue, improving the precision of both diagnosis and treatment.

## Board Certified Orthopedic Surgeons

The orthopedic specialists who work with us at Lane Regional Medical Center are a group of experienced, skilled, board-certified surgeons who utilize advanced technology and state of the art medical equipment and techniques to accurately diagnose and treat your condition.

With the advent of arthroscopic and endoscopic procedures, our surgeons can repair damaged joints and muscles less invasively, which means less scarring and a quicker recovery time.

David Rabalais, MD

Adam Whatley, MD

## Our Team

In addition, our orthopedic care team consists of:

- Anesthesiologists
- Dietitians
- Discharge planners
- Nurses
- Nursing assistants
- Nurse practitioners
- Nurse case managers
- Occupational therapists
- Physical therapists
- Respiratory therapists
- Social workers
- Other health care professionals

Whether you need a simple arthroscopic procedure or complete hip replacement, rest assured that you are in good hands with the team of specialists at Lane Regional's orthopedics department.

## Hospital-based Rehabilitation

Following your surgery, you can recover in Lane Rehabilitation Center, our 30-bed inpatient facility that provides a comprehensive rehabilitation program for adult patients with orthopedic conditions.
