Care You Can Count On

Bone and joint conditions make even simple activities a challenge. At Lane, our orthopaedic surgeons provide a complete range of diagnostic and treatment services designed to get you back on your feet and enjoying a pain free, active lifestyle in as little time as possible.

Comprehensive Approach

With the advent of arthroscopic and endoscopic procedures, our surgeons can repair damaged joints and muscles less invasively, which means less scarring and a quicker recovery time.

Our comprehensive approach to prevention, assessment, treatment and rehabilitation includes:

- Precise evaluation and diagnosis using the latest digital imaging tools
- Customized treatment plans
- An innovative combination of rehabilitation therapies and medically supervised fitness training
- Support for rehabilitation and recovery with appropriate pain management strategies

Compassionate Care

At Lane, we treat each patient like family. Our dedicated team of doctors, nurses, therapists and other healthcare professionals carefully attends to your needs and concerns, enabling you to focus your energy on recovery and rehabilitation.

Advanced Technologies

Our highly skilled physicians utilize advanced technology and state of the art medical equipment and techniques to pinpoint damage to bones, joints and soft tissue, improving the precision of both diagnosis and treatment.

The advanced imaging capabilities at Lane Regional Medical Center include:

- High Field Magnetic Resonance Imaging (**MRI**)
- Direct Digital Radiography (**X-Ray**)
- MultiSlice Computed Tomography (**CT**) Scanning
