

.Net Programmer

- **Developing .NET solutions**
- **Friendly environment**
- **Iconic kiwi IT company**
- **Greenlane location**

About the role

We are looking for an awesome .NET Analyst Programmer with strong technical ability to join our development team. This role is primarily about developing solutions across the .NET stack (primary skill) with an opportunity to utilise secondary skills as noted below.

This role is responsible for the creation and maintenance of our clients' systems including design, development and support using the full software development lifecycle. The key focus of the role is to ensure effective and efficient development and delivery aligned to best practice.

This role has some requirement for pre-sales technical/consultative services to our clients.

About you

Essential skills and experience

- You are a mature and seasoned programming professional with at least five years hands on industry experience encapsulating the full software development lifecycle developing solutions based on the .NET framework
- Clear and confident communicator, comfortable in front of management and clients
- Excellent command of spoken and written English
- Advanced knowledge and experience in designing web applications
- Enterprise systems architecture knowledge/experience, MS technology evangelist
- You currently reside in Auckland with minimum three years development experience in NZ

Mandatory technical competencies

- Visual Studio
- ASP.NET
- ASP.NET Web API 2+
- C#
- JavaScript
- HTML/CSS
- XML
- XAML
- JSON
- Experience with various API's
- Microsoft SQL Server (T-SQL and general admiration)
- SSRS and its integration
- IIS
- Application maintenance on Azure

Other technology skills, which would be highly regarded

- Any experience in Java
- Experience with Agile/Scrum development
- Experience developing applications for the cloud
- AI/IOT
- AngularJS
- NodeJS
- Python

- SharePoint
- Exposure to other databases and platforms (NoSQL)
- Testing Frameworks
- Mobile development (Xamarin)
- Microservices
- BI/Big Data
- Open source development

In return you will receive:

- Excellent career progression opportunities
- The fun stuff: pool table, Friday drinks and lunch provided every day!

About SASIT

SASIT works with organisations in New Zealand and Australia to help them become more efficient and more competitive, through the effective use of IT systems. Recognised as one of the most trusted Managed Services Providers (MSPs) in Australasia, our brand is built on technical excellence and an unwavering focus on delivering the right customer outcomes. Our solutions span; consulting, design, development, deployment, operations, and 24x7 support. With over 60 staff, infrastructure installed at seven data centres throughout Australasia, and a commitment to public cloud services, the company has the expertise and the resources to manage the most demanding mission critical systems.

If you are a passionate and committed technologist, then please apply today! Our requirement is for an immediate start.

Please note, only short listed applicants meeting all stated criteria will be responded to for a short listed interview.
