

「 The world is getting smaller.
The risks are getting larger. 」

Introducing AirGuard®. A new level of safety and loss control services from AIG Aerospace in partnership with Wyvern.

The aviation risk and regulatory environment is constantly changing. That's why AIG Aerospace is introducing AirGuard®. A new suite of best-in-class safety and loss control services expressly designed to help you stay ahead of the challenge. Managing your operational risks and building a solid foundation for business continuity and growth.

Bring on tomorrow

Bring on tomorrow

Going above and beyond with Wyvern

Our deep understanding of the aerospace insurance industry and our global presence make AIG a strategic partner in addressing your risk management needs. Now we're partnering with Wyvern, a world leader in aviation risk management and safety consulting and data services, to bring you a full range of innovative, state-of-the-art safety and loss control tools offered at a preferred rate:

Organizational Safety Risk Profile and Best Practice Assessments

Wyvern evaluates your operation's specific risks to target specific goals while developing an ongoing proactive safety culture.

Quality and Safety Management System & Emergency Response Plan Implementation Consulting

Wyvern helps you implement a Safety Management System with an effective Emergency Response Plan that is compliant with recognized industry guidelines. Wyvern makes available an electronic hazard reporting tool that promotes organizational involvement with the goal of reducing operational hazards.

IS-BAO Stage I, II & III Certified Audit and Gap Analysis Services

Wyvern conducts a comprehensive onsite audit to verify your operation complies with the International Standard for Business Aviation (IS-BAO) protocols toward your certification. In preparation for your next IS-BAO audit, Wyvern can perform a gap analysis of your systems, policies, processes and procedures (either onsite or remotely) to help you achieve your desired Stage.

Wingman Operator Certification or Custom Audits for Charter Vendors

Considered the gold standard of air charter safety audits, the Wingman commercial best practice standard uses IS-BAO protocols for Stage II as a baseline and audits against ICAO Document 9859 for Safety Management Systems. Custom audit programs may also be designed and implemented.

Desktop Audits

Gain insight into a charter operator akin to an onsite audit but with a mission-specific directive and report.

Safety Intelligence Report and Pilot and Aircraft Safety Survey (SIR/PASS)

Access the largest, most up-to-date database of charter operators, pilots and aircraft and create trip due-diligence reports for every flight against your company's safety standard with gap analyses.

Web-based Safety & Risk Management Training Courses

Wyvern can customize online training for employees at every level of your operation for a variety of leading edge safety topics.

EXACT RPAS (UAS) Operator Audits and Certification Program for Assessors

A quality program assessment for Remotely Piloted Aerial Systems (RPAS) benchmarked against ICAO Document 10019 (Manual on Remotely Piloted Aircraft Systems). EXACT is a certification process for RPAS operators and a program for assessor accreditation.

Partner Products

As an industry thought leader, Wyvern partners with safety-conscious companies to provide additional support for our customers' advanced risk mitigation initiatives. We identify the tools you need for your department to meet the highest level of safety compliance. Wyvern's suite of Partner Products allows you to participate in a global commitment to continual improvement and a proactive safety culture.
