

# ATPI TravelHub™

## Your No.1 business travel dashboard

**New!**

What is TravelHub?

# Is arranging your corporate travel a source of stress?

Booking and managing corporate travel can be complicated. How do you maintain visibility and control over how your organisation travels? We have the solution: ATPI TravelHub™.

A clear, user-friendly dashboard that gives direct access to all the travel-related tools and data that you need to book and manage corporate travel efficiently.

A person is sitting at a desk, looking at a laptop. The laptop screen displays the ATPI TravelHub dashboard, which includes various icons for 'ONLINE BOOKING TOOL', 'BOOK HOTELS', 'TRAVELLER PROFILES', 'EXPENSE', 'MANAGEMENT INFORMATION', 'TRAVEL ALERTS', and 'DOCUMENTS & VOUCHERS'. The person is holding a pen and looking at a document on the desk. There is a white mug on the desk next to the laptop.

**ATPI TravelHub™ enables you to effortlessly arrange all of your business trips in one place.**

Whether you're booking travel, examining price comparisons, investigating cost analyses, submitting travel expenses or even tracking travellers, ATPI TravelHub™ gives you the power to do this quickly and efficiently, 24/7 365.

# What can ATPI TravelHub™ do for you? ●

ATPI TravelHub™ is an essential portal for anyone dealing with corporate travel. Our expert Janneke Wolthuis explains how this works and what it can do for you.

## Arrange all corporate travel efficiently and simply

If you're in charge of arranging business travel within your organisation, then you'll already be aware of what the process involves – it's rarely a case of booking a straightforward flight. You keep an eye on the travel costs, know where to realise cost savings, ensure that travellers can travel as safely as possible and are always available for last-minute changes. But how do you ensure that you arrange everything as efficiently and simply as possible?

ATPI has the perfect solution for this: ATPI TravelHub™. With ATPI TravelHub™ you can effortlessly manage your business trips simply and efficiently, using one clear dashboard with access to all corporate travel programmes, whether these are provided by ATPI or a travel supplier of your choice. So, how exactly does this work? Janneke Wolthuis, whose responsibilities at ATPI include the rollout of TravelHub, explains why this portal is an essential solution for companies dealing with corporate travel.

# What can ATPi TravelHub™ do for you?

## Everything at hand, all in one portal

"Anyone arranging corporate travel knows how complicated and time-consuming this can be. It's not just a case of managing the individual wishes of the travellers, but also the various tools and systems that are required to make one booking; every system requires a new login, user training and a transfer of information between each system. We noticed that our customers needed a single clear system in which all the tools would come together. And this is how ATPi TravelHub™ came about," says Janneke.

"Customers particularly appreciate the efficiency, the ease of use and control provided by ATPi TravelHub™."

## Access to your important information at all times

ATPi TravelHub™ is a user-friendly portal that can be linked to customers' existing systems. "Travel managers, those booking the business trips and travellers alike, all have their own login details for the portal. It is possible, for example, to set various authorization levels allowing everybody access to the information that's relevant to them. No matter where in the world you find yourself, you'll be able to log in to the portal and have instant access to tools such as an online booking tool, extensive management information and a traveller tracking tool. This allows you to follow the company's travellers wherever they are in the world, so that in the event of an emergency immediate assistance can be given," says Janneke.

# What can ATPi TravelHub™ do for you?

## Also suitable for external tools

ATPI TravelHub™ also includes a suite of extra services, including an expense management system, a tool for hotel bookings, visa service

CIBT and a personal profile in which travellers can save their data so that on their business trip they always have this at hand.

For the online booking section, use

can be made of, for example, Concur and Cytric or Amadeus. When making a booking, the travellers' profiles are already in the system and, if desired, an authorisation process can be added.

## Customers appreciate the efficiency and convenience

Janneke: "At the beginning of April, the first customers of ATPi in The Netherlands started to use ATPi TravelHub™. In the United Kingdom our customers have already been using it for a while, and are very excited about our portal. They particularly see the advantage in the efficiency and convenience it offers, and the fact that they are in control in an environment with an increasing number of providers and complexity."

# Discover the advantages of ATPi TravelHub™

The new portal offers many advantages in addition to efficiency and ease of use:

Complete overview of all business travel expenses and travellers' location

Integration and management of international, regional and local suppliers

Personalised access to systems, products, functionalities and content for various authorization levels, departments and locations

Viewing and processing extensive amounts of information via a single platform

Online booking tool for bookings made by the traveller, improving compliance with travel policy, preventing a loss of bookings and optimising the total duty-of-care.

Central management of travellers' profiles for all products of both ATPi and preferred suppliers

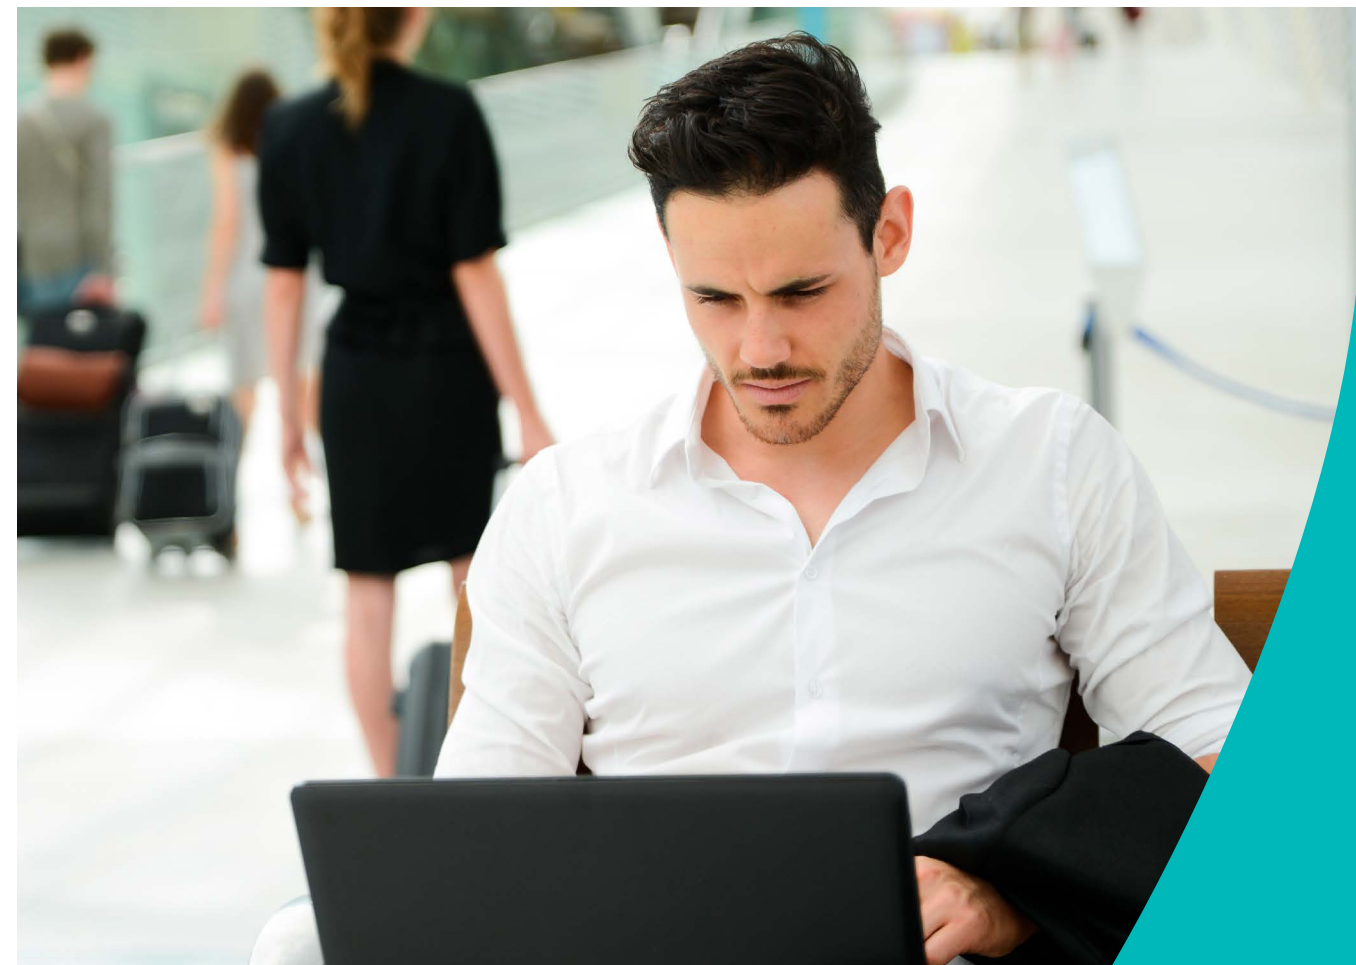

Single sign-on and optional integration of your internal systems and platforms

Simple and safe management of all your travel tools and technology

Simple, intuitive and adjustable user interface, available on desktop and tablet

6 months free

# TravelHub offer: six months free of charge (worth € 750)
