### Description

The S-25A30 is a 25 megapixel CMOS global shutter camera and delivers images of 5120 x 5120 pixels at 32 fps over Camera Link. Using the standard Region of Interest function the frame rate can be increased, e.g. 100 fps at 8 Mpx.

Embedded real-time pixel processing minimizes blemishes and maximises uniformity. The combination of Adimec image quality, form factor and low power usage makes the camera ideal for inspection systems that require high resolution to increase in throughput or accuracy.
