

Case Study

Legal Services: Preferred IT Partner for Right Choice Conveyancing

About Right Choice Conveyancing

Right Choice Conveyancing are a specialist conveyancing business regulated by the Council for Licensed Conveyancers. An independent, owner/managed business with legal teams based in offices in Milton Keynes, Bedford and Northampton.

Unlike many law firms Right Choice choose to specialise in one area of work which means that our staff, systems and procedures are all designed around offering the absolute best conveyancing service for all their customers.

The Relationship

After an extensive tendering process and research of the market, overseen by an independent Virtual IT Director.

Aztech IT Solutions were selected as the new preferred IT Partner for Right Choice Conveyancing.

The Challenge

Right Choice Conveyancing had a previous long-term partnership with another IT provider. The encumberment provider hosted their entire IT infrastructure in a private cloud. Aztech were tasked with moving, migrating and upgrading the entire IT infrastructure to a new cloud solution.

Right Choice wanted a highly resilient, scalable and high performance system to facilitate fast growth and change in their business.

With Right Choice Conveyancing providing legal and conveyancing services disruptions to critical business applications was not an option.

The migration needed to be a seamless transition with no impact on the ability for Right Choice to service its clients.

Company: Right Choice Conveyancing

Sector: Legal

Location: UK

THE SOLUTION

Aztech designed, configured and deployed a full cloud solution utilising Microsoft Azure and Office 365. The entire IT infrastructure, business applications and data was migrated seamlessly with no disruption to business continuity.

Aztech continue to provide on-going IT managed services, strategic IT planning and cloud services to Right Choice Conveyancing.

"We clearly see the benefits and reliability Aztech IT's 'managed services' offering has brought to the smooth operations of our business. Aztech IT complement our internal IT Team seamlessly with their IT experts and powerful IT tools to proactively manage our IT and security environment."
