

Full Stack Developer

About Capacitas

Capacitas is a leading IT consultancy firm which helps its clients deliver IT faster, mitigate IT performance risk and reduce IT cost. We work with large-scale clients such as easyJet, Arcadia, Skype and Ancestry.com. We are also an AWS partner, and allow our employees to seek training opportunities that will allow them to further enhance their expertise and knowledge in their chosen career paths.

The software we develop is integral to our consultancy services. We are expanding rapidly with 30% growth this year. This is a fantastic opportunity to join a growing software development team that will be integral to the company's success in the future.

The Role

We are looking for a Full Stack Software Developer to join our expanding development department. We are looking for a motivated and self-driven individual that can heavily contribute to the team, with a strong ability to contribute to both an elegant UI for our software solutions, and an equally elegant back end architecture.

As a Full Stack Software Developer, you will be participating in the team's development lifecycle whereby we adhere to the SCRUM methodology. You will be expected to liaise with stakeholders, gather requirements from specifications, collaborate with team members and produce high quality unit testable code.

You will have at least 2 years' experience in working as a software developer. This role will be based in Capacitas' office in London.

Responsibilities

The main responsibilities that you will be required to take charge of are:

- Design reusable extensible solutions
- Output high quality code
- Collaboration with the development team and the wider company
- Participation in all SCRUM Ceremonies
- Drive forward technical change as required
- Reduce existing technical debt
- Provide support and assistance to product users
- To be involved in requirements gathering and PBI specifications

Qualifications

You must hold a degree of 2.1 or higher in Computer Science or a related subject.

Requirements

The following skills are essential for this role:

- Experience with C#
- Experience with databases – Relational or NoSQL
- Web Design
- An understanding of OO and its fundamentals
- Knowledge of agile methodologies
- Knowledge of SDLC
- A good problem solver with the ability to adapt to the challenge

Desirables

Experience in the following areas would be advantageous for this position:

- Experience with Angular
- Experience of Data visualisation
- Experience with additional languages, such as – Java, Python, TypeScript
- Design Patterns
- Unit Testing Experience
- Exposure to Angular Development
- TFS
- Visual Studio and Visual Studio Code
- Visual Studio Online (VSO)
- JIRA Service Desk experience
- MySQL Workbench or SSMS
- RoboMongo

Application process

Please submit your application through <http://www.capacitas.co.uk/application-form>, indicating 'Full Stack Developer' as the position applied for. Applications will be dealt with on a first come, first served basis. Interviews will be held immediately.

Capacitas reserves the right to close this vacancy if a high number of applications are received. If you are interested in this role, please submit your application as soon as possible.
