Pipeline Coating

Houston / 2018

The North American region is a dominant region in the global pipe coatings market. The third Pipeline Coating USA 2018 Conference will bring together pipeline operators, contractors, pipe mills and coaters, researchers, engineers, specifiers, and materials and machinery suppliers to discuss business and technology trends in the North American pipeline industry.

Pipeline Coating 2018 will feature case studies and discussions of technical coating challenges associated with pipeline protection. This will be a unique opportunity to hear from industry experts on their experiences, lessons and suggestions to enhance pipeline coating and protection.

The two-day program will cover topics on hot industry issues like Field Joints pipe coating preparation, cathodic protection and FBE, testing and regulation, saving pipeline assets from microbially influenced corrosion and improving flow performance. The conference will also explore high performance coatings for use in water distribution, as well as solutions for oil & gas infrastructure. Join leaders from the entire pipeline coating supply chain at Pipeline Coating 2018 - the only event focused on this industry in North America.
