

Diamond® Hardware

Round Drop Clamp

Features & Benefits

- Shell and wedge made of high-grade aluminum alloy
- Shim made of high strength Acetal
- Tail wire made of high-grade stainless steel
- Mechanical strength of 555 lb (251.7 kg) exceeds yield strength of drop wire
- Suitable for 5 mm – 8 mm MASS/ADSS fiber

Overview

PPC's Diamond® Fiber Clamp is used to support both ends of an aerial service drop span at the messenger strand and building. The unique, proprietary approach that we have developed for mechanical galvanizing – and the standards we insist on for our raw materials – ensure our Diamond parts can withstand corrosive environments for decades. A long-lasting product is an important factor since replacement costs are so high.
