

Diamond[®] Bonding Clamps

Bonding Connectors for Meter Panels — Front Mount

The Diamond[®] Difference™

Does Your Hardware Pass the Test of Time?

- superior resistance to corrosion.
- most effective method for small parts
- Eliminates the problem of Hydrogen Embrittlement.

Diamond[®] Products Stand the Test of Time.

SC-51 Bonding Connectors for Meter Panels —Front Mount

- Stainless steel mounting screw is specially designed to remove/pierce paint on the meter box, ensuring a positive metal-to-metal contact with the box surface
- Its unique design allows a fixed and positive mechanical contact without interfering with the opening of the meter pan front cover
- The dual mounting screws are furnished with locking nuts, assuring that the connector will not loosen over time
- Stainless steel body and mounting studs for a long corrosion-free service life
- Tighten screws to 20 in. lbs. torque.
- UL and CSA listed

SC51CF— for CATV and DBS Applications

- Accepts #10, #12 or #14 AWG copper ground wire
- Clearly embossed with the words CABLE TV and DO NOT REMOVE

SC51CF85 — for Telephone Applications

- Accepts up to a #6 AWG ground wire
- Supplied with stainless steel ground terminal
