## Operations Manager 2016 Proof of Concept

### Contact Us Today

 [sales@kizan.com](mailto:sales@kizan.com)  (877) 775-7159

### High Level

KiZAN will work with your staff to implement a System Center Operations Manager 2016 Proof of Concept environment for testing and evaluation. With the PoC environment you will have a fully functional test environment to evaluate SCOM management and functionality. The evaluation install is good for 180 days, and can be extended indefinitely with the application of a product key.

- Review the test domain to ensure it meets the needs of the SCOM instance
- Review the SCOM host and install prerequisite components
- Implement a single-server SCOM environment with support for:
  - Real-time monitoring and alerting
  - Metric collection and dashboards
  - Notification management with SMTP integration
  - Reporting
  - Deploy up to 5 test agents
  - Provide a knowledge transfer session reviewing basic management and functionality

### Requirements

- Test domain at 2008 functional level or above
- Host running Server 2016
- 4 Cores
- 16gb RAM
- 200gb Storage
- Supported OS's include 2012/2016

### Additional Services

- Rollout SCOM as your monitoring solution! We do pilot and production design and deployment of SCOM
- PoC, pilot, and production design and deployment of any of the other System Center solutions
- Get a tune-up! Health check and remediation services for all of the System Center solutions
- Expert assistance with custom monitoring, custom dashboards, 3rd-party integration, audit collection services, and more!
