

Perma-Patch®

Premium
Asphalt Products

THE POTHOLE SOLUTION

PERMA-PATCH®: an all season, all weather, permanent asphalt patching material. Perma-Patch® is easy to use—no mixing or special repair area preparation. Perma-Patch® can be placed directly in water-filled holes, displacing the water and bonding well to any wet repair areas. Perma-Patch® can be used in a temperature range of 0°F to over 100 °F and accepts immediate traffic.

Most durable for permanent repairs of potholes, utility and cable cuts, parking areas, and around manhole covers or utility boxes. Perma-Patch® bonds permanently to asphalt, concrete, steel, wood, and other hard surfaces.

Creates a water-tight seal on the top surface layer while acting like an expansion joint underneath. Out-performs hot mix asphalt in small repair areas.

Perma-Patch®

Perma-Patch® when properly applied will outlast the surrounding pavement.

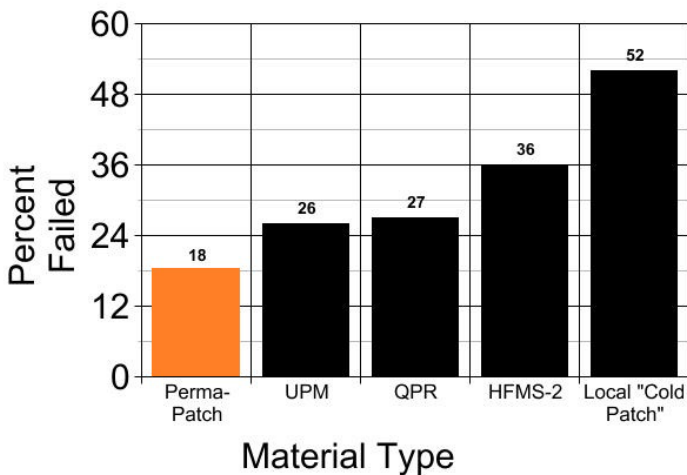

Perma-Patch® is **environmentally friendly** with little or no waste when poured from a bag.

Perma-Patch® comes in convenient 60 lb. water resistant bags with a minimum two year shelf life.

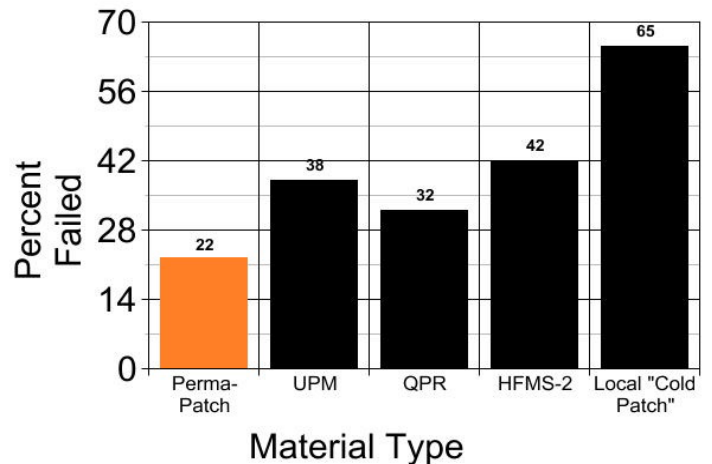

Perma-Patch® can be applied as thin as one stone thickness (1/4") due to its excellent bonding strength. It easily fills depressions and utility cuts.

The Federal Government rated Perma-Patch® the # 1 most durable cold applied repair material in North America in its 18 month and 4.65 year SHRP study. Perma-Patch® had the lowest failure rate by 45-70% over its closest competitors.

After 18 Months

After 4.65 Years

SHRP shows Perma-Patch with lowest failure rate among commercially available material types tested
