

BigFix Jumpstart Implementation Services

The BigFix platform allows an enterprise to incorporate a unified endpoint management strategy with minimal setup time and no learning curve for administrators when managing multiple operating systems. Real-time endpoint vulnerability data is available within minutes of installation and large-scale remediation takes hours, not days. The modular approach makes it easy to buy just what you need and expand without having to rip-and-replace. The platform's architecture also allows for scalability of up to 250,000 endpoints using a single BigFix core server. Currently there are more than 1,000 companies that trust the security of more than 50 million endpoints to BigFix.

Tasks/Duration:

- **2 Weeks - \$14,000**
- Operational and Architectural Planning
- Installation and Configuration
- Deployment of agents to endpoints
- Initial Compliance Assessment
- Setup of Patch Baselines and Deployment Policies
- Setup of Web Reports and create Patch Progress reports

Expected Deliverables:

- Functional BigFix Core Server
- Functional Web Reports Server
- At least one Relay
- At least 10 BigFix clients installed
- Initial Patch Compliance Assessment of installed Clients
- Remediation of at least 1 patch across the managed endpoint population
- Installation Guide and Runbook
- Basic knowledge transfer to client resources

For more information:

Let Lighthouse come in and jumpstart your implementation services and provide you Instant ROI!

Benefit:

- Gain real-time visibility into the compliance of the managed endpoint population
- Deliver initial assessment of customer endpoints that they can use as a basis for comparison with their internal compliance assessments.
- Reduce FTE resources needed to manage endpoints across multiple operating system platforms
- Reduce time to fully patch vulnerable endpoints from days or weeks to hours
- Manage endpoints across multiple operating system platforms using a single agent and a single console
