24x7 Managed Security Service
IBM QRadar Security Intelligence

Your threat landscape is evolving and accelerating faster than you can hire security professionals to even keep up. Responding to these risks requires smarter, intelligence-driven solutions that focus on maximizing resource effectiveness and minimizing damage incurred.

Lighthouse's Managed Security Services are designed to serve as a remote extension of your security staff. We provide turnkey solutions for your complex information security challenges. By combining and correlating log activity, our services help eliminate blind spots and provide visibility to what really matters. Our experienced security professionals provide the essential expertise and infrastructure your organization needs to:

- Effectively monitor the security of your environment
- Improve your security posture efficiently and effectively
- Achieve greater visibility and simplify reporting
- Quickly identify, analyze and respond to potential security threats
- Maximize your security technology investment
- Focus existing staff on your core business needs

Established out of years of experience in supporting customers with their security posture, Lighthouse now offers Comprehensive managed security services for the IBM QRadar product family delivered by our team of vulnerability and security researchers, from multiple security operation centers across the country to support your organization on-demand, **24 hours a day, 365 days a year**.
