

Lincoln, RI - As a long-standing Microsoft Partner and Competency Program member, Lighthouse Computer Services is proud to announce that, in addition to its Gold Content and Collaboration and Silver Mid-Market competencies, it has attained Silver competencies in Cloud Platform, Cloud Productivity, and Application Development.

Attaining the Cloud Platform competency demonstrates Lighthouse's expertise in using the Microsoft Azure platform to build, integrate and/or extend Windows-based applications, cloud integrated storage (CIS), and infrastructure solutions in the cloud.

The Cloud Productivity competency demonstrates expertise in deploying Office 365 components including SharePoint Online, and Exchange Online. With more than 50 percent of Fortune 500 companies purchasing Microsoft Office 365 in the past year, the Cloud Productivity competency will enhance Lighthouse's ability to address the growing customer demand for cloud and hybrid solutions.

The Microsoft Application Development competency highlights our skill and experience in leveraging Microsoft technologies such as .NET and SQL Server to design and build applications to meet our customers' web, desktop, mobile, data integration and reporting needs. Earning the Application Development competency helps Microsoft partners like Lighthouse further differentiate themselves as a proven expert in the development and deployment of commercial or custom applications using core Microsoft technologies.

Tom Mrva, CEO and President of Lighthouse Computer Services, added: "Lighthouse is committed to excellence in delivering Microsoft solutions that help our clients achieve business agility and competitive advantage. Microsoft solutions are robust in themselves, but their effectiveness is optimized when designed and implemented by a trusted partner with a deep understanding of both the business challenges and the full-range of real-world capabilities the tools offer."

We look forward to sharing our expertise and experience to help find the right solutions for your unique business needs

The Lighthouse Microsoft Technology Group (MTG) consists of a team of seasoned professionals with tremendous experience in developing and delivering solutions leveraging the full suite of Microsoft's application development tools, particularly in the areas of SharePoint, Custom Application Development, Business Intelligence and Cloud-based solutions including Office 365. These experts have been working together with SharePoint and .NET since their inception in 2001 and, to date, have completed over 300 implementations for mid-market and enterprise clients including intranet, extranet, internet deployments, and custom information worker solutions. This team is well positioned to provide best in class solutions for complex enterprise environments to companies across a range of industries. The current portfolio of MTG services includes:

- Web Content Management - Intranets, extranets, and public facing web sites
- Taxonomy and User Experience design expertise
- Collaboration and Social Networking expertise
- Custom developed .NET solutions for Web and Desktop
- Responsive design and hybrid platform development to support tablets and smart phones
- Business Process Management and Integration Solutions
- Enterprise Search Capabilities
- Business Intelligence & Reporting Solutions
- Platform assessments and roadmaps
