

**FOR IMMEDIATE RELEASE**

## **LIGHTHOUSE COMPUTER SERVICES STRIKES NEW PARTNERSHIP WITH PITNEY BOWES TO DELIVER ADVANCED DATA SOLUTIONS**

**STAMFORD, Conn., September 15, 2016** - Pitney Bowes (NYSE:PBI), a global technology company that provides innovative products and solutions to power commerce, today announced a new alliance with [Lighthouse Computer Services](#), a leading Northeast Systems Integrator with an expanding Big Data and Analytics practice. The two companies will go to market with customized data solutions designed to help businesses attract and retain valuable customers, improve the efficiency of marketing campaigns, and combat the risks of fraud.

For the past 25 years, Lighthouse Computer Services has been servicing customers on their data management needs. Customers across a wide range of industries, including healthcare, retail, higher education, manufacturing and financial services are challenged with gleaning actionable insights from their data, especially as the amount of data multiplies exponentially each year. Lighthouse has an advanced analytics practice that specializes in the creation of solutions that allow customers to integrate existing data sets into intuitive and visually compelling dashboards and analytics to drive meaningful insights.

Similarly, for the past 30 years, Pitney Bowes delivers powerful technologies for data management which helps companies streamline their customer information management strategies. The company has a full suite of offerings designed to address common data management challenges such as: powering accurate and precise location intelligence technologies, delivering comprehensive Master Data Management capabilities and offering powerful address validation technologies.

"We are excited to join forces with Pitney Bowes to implement innovative data management solutions for our clients," said David Doucette, President of the Analytics Division of Lighthouse. "The sophisticated geocoding and reverse-geocoding technologies, in particular, will enable us to innovate entirely new use cases and solutions. We look forward to building influence with these new location-based capabilities."

Lighthouse will go to market with Pitney Bowes' Single Customer View solution immediately. It will soon expand to sell offerings built on the company's leading customer engagement, location intelligence and data quality technologies to help businesses address and improve their customer experience challenges.

"We are thrilled to see new partners like Lighthouse embrace our location intelligence technologies to drive new innovations in data management," said Mark Taylor, SVP Software Channels, Pitney Bowes. "I see a lot of great synergies and strengths that we can draw upon from our respective technologies and teams to deliver increased client value."
