

## Lighthouse Computer Services Joins the Microsoft V-TSP Program

Lighthouse Computer Services is proud to announce that three members of its Microsoft Technology Group, Senior Architects Mary Harvey, Senthil Panchatcharam and Suresh Ural, have been accepted by Microsoft to be part of the Virtual Technology Solution Professional (V-TSP) program.

The Microsoft V-TSP program is a select group of high performance individuals chosen from the Microsoft partner community, whose focus is to augment Microsoft's internal technology specialist team. Their primary role is to communicate the value of Microsoft solutions and provide architectural guidance for Enterprise Integration solutions. The V-TSPs further empower customers by delivering pre-sales activities and resources to help them meet their most aggressive IT solution and integration goals.

The new team members will assist Microsoft with highly advanced implementations and key account support initiatives. As an added benefit to Lighthouse customers, they will have access to online resources usually reserved for Microsoft internal teams, including exclusive information about new Microsoft product releases.

"The inclusion of Mary, Senthil, and Suresh in this program is a testament to their deep experience, dedication and technical excellence implementing Microsoft technologies," said Ernie Yenke, President of Lighthouse Computer Services. "This further exemplifies Lighthouse's commitment to the Microsoft technology platform and our long-standing partnership with Microsoft."

### About the Lighthouse Microsoft Technology Group

The Lighthouse Microsoft Technology Group (MTG) works collaboratively with customers to deliver engaging solutions leveraging Microsoft products. The Lighthouse MTG team has extensive experience in providing solutions to hundreds of customers leveraging the full suite of Microsoft's application development tools, but particularly in the areas of:

- SharePoint
- Custom Application Development
- Business Intelligence
- Cloud-based solutions including Office 365 and Azure Services

The Microsoft Technology Group has the ability to provide its customers with Microsoft development expertise and a broad array of consulting services such as project management, business analysis, user interface design, and governance.
