

Primary Cells Product Information Sheet

Cell Type: Monocytes (CD14+)

Cell Count: 20 x 10⁶ cells

Product Description

Primary human monocytes (CD14+) were isolated from peripheral blood mononuclear cells using positive immunomagnetic separation techniques.

Cells were obtained using Institutional Review Board (IRB)-approved consent forms and protocols.

Donor Status: Normal

Characterization Criteria: Cell count, viability, purity, donor virus testing, age, sex, ethnicity, weight, height, smoking status, other information

Format: Monocytes (CD14+) are frozen in CryoStor® CS10.

Purity: The purity of Monocytes (CD14+) is ≥ 90% by flow cytometry.

Anticoagulant: Acid-citrate-dextrose solution A (ACDA)
