

Fleet Maintenance & Management for the ServiceNow Platform

Finally, A Way to Track and Manage the Vehicles and Fleets that Run Your Organization, Run by Stave ServiceNow[®]

Automate the management of your fleet assets in a single, easy-to-use system

AssetPath's Fleet Management module provides fleet managers an easy-to-use, automated solution for fleet management, tracking, availability, maintenance planning and execution, warranty, repair and more. AssetPath provides day-to-day administration automation and operational reporting to support long-term fleet asset lifecycle management from procurement to disposal.

With the capabilities of the Fleet Management, you can:

- Manage your fleet assets
- Keep your fleet legally compliant
- Manage fleet parts and inventory
- Control fleet maintenance and repairs
- Have real-time visibility of your fleet asset data

Key Benefits

- Increased Fleet Availability
- Preventative Maintenance
- Real-time, End-to-End and Roll Up Visibility
- Increased Fleet Fuel Efficiency
- Reduce Fleet Expenses & Labor Costs
- Increase Fleet Security & Safety

Vehicle Assignment and Self Check-Out

Managing who in your organization is currently using which vehicles can be a challenge. AssetPath makes it easy to see what cars, trucks, and equipment are currently in-use and allows your team members to check-out vehicles when needed from their computers or mobile devices.

Maintenance and Work Order Reporting

When issues arise that require repair work, fleet users can quickly report those issues using graphical web catalogs. Fleet Managers can instantly see those new requests come in and assign work orders to various repair groups that include notifications all from within the same system.

Fleet Readiness Awareness

Everyone strives to have 100% of the fleet operational at any given time, but often you have to work around vehicles that are down for maintenance. Graphical web dashboards show you at a glance your readiness levels, across locations, by vehicle type, and by severity.

Unlimited Vehicle Types

Many organizations use more than cars, trucks, and the occasional forklift. AssetPath allows any number of vehicle types to be tracked, including any heavy equipment, specialty vehicles, or even non-traditional vehicle types.

Fuel Tracking

Drivers using the mobile-friendly AssetPath can record their refilling with a few clicks. This data is aggregated in the cloud and geo-tagged to give you insight into all fuel usage over time.

Emergency Services for Passengers

Help is never more than a click away with emergency response built into AssetPath's mobile interface, giving your drivers peace of mind and added security on the road.

Fleet Management

Geo location-aware vehicle management gives you insight into where your vehicles are located, with whom, what maintenance they have required or do required, and how everything aligns financially.
