Stave Benefits

Rapid Deployments

With Stave Applications, you are able to get up and running a lot quicker than a traditional ServiceNow custom application or independent software purchase.

Simple Configuration

No more customization. Stave Applications use existing ServiceNow technology so ServiceNow administrators can make needed configuration changes with just a few clicks.

Certified & Scoped

All of our applications are scoped and certified by ServiceNow. This means you get managed updates and support included with your purchase. Your application will upgrade when you upgrade.

AssetPath

End-to-End Asset Management and Maintenance to Better Run Your Business
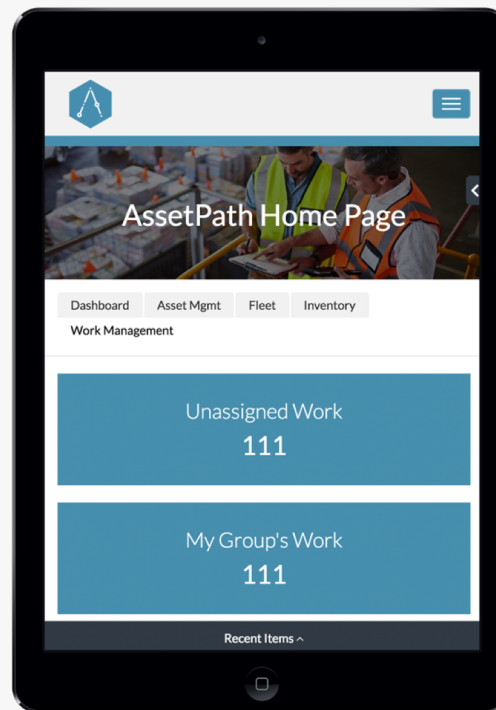

AssetPath Features for Managers

Maintenance

Enable maintenance teams to keep a record of all assets they are responsible for, schedule and track maintenance tasks, and keep a historical record of work they perform.

Disposition

Maintain an accurate record of each asset throughout its life, and record all steps in the disposal process to make sure it's carried out safely and according to company policy.

Tracking

Track parts and supplies, optimize inventory levels, or manage inventory at multiple locations through a single, integrated maintenance and asset management system.

Requisition

Create purchase requests, check inventory, or source assets all in one easy to use portal.

AssetPath Features for Managers

Audit

Keep an unchangeable record of every action, so your inventory's maintenance history can be audited.

Cost

Gain an understanding of your inventory cost and determine the stock levels that meet asset availability requirements while limiting the inventory carrying costs.

Scanning

Track and scan all equipment, materials, consumables, and capital assets using either high-speed QR code scanners, barcodes, or computers.

Lookup

Keep data in a centralized system, which helps keep one version of the truth. Let your team see how many items are in storage, where they are located, who is responsible for them, how many were used in repairs, and when new ones need to be ordered.

AssetPath Features for Requestors

Improved Experience for Self-Service

Asset Check Out

Take out shared tools, vehicles, equipment, and any asset simply by reserving the item through a user-friendly portal.

Work Order Request

Initiate work order requests to fix what's broken or order what you need using a simple online catalog and shopping cart.

Track Requested Orders

Receive a mobile notification when the job or item you requested has a status update. Easily see anything holding up your requests.

My Assets

View all the company assets assigned to you, create work requests for maintenance on any item, report damages or losses easily.
