#### Changing the way you use ServiceNow

We're Software, Not Professional Services

# Stave is the <u>Leader</u> in the ServiceNow Store

Stave applications extend the ServiceNow Platform to help you maximize your investment in the platform. Our applications pick up where ServiceNow left off, to provide a true platform experience for different business units across the organization.

- **⊘** 100% Dedicated to the ServiceNow Platform

**Our Value to Every Customer** 

#### **Stave Benefits**

#### **Rapid Deployments**

With Stave Applications, you are able to get up and running a lot quicker than a traditional ServiceNow custom application or independent software purchase.

#### **Simple Configuration**

No more customization. Stave Applications use existing ServiceNow technology so ServiceNow administrators can make needed configuration changes with just a few clicks.

#### **Certified & Scoped**

All of our applications are scoped and certified by ServiceNow. This means you get managed updates and support included with your purchase. Your application will upgrade when you upgrade.

#### **Customers**

#### **Automated Tasks**

Tasks, alerts, and prompts provide a guided walkthrough of the steps required for properly putting together an ATO package.

#### Automated Controls

Automatically allocate system-specific, hybrid, or common security controls for each system based on the system's specifics and your organization's boundary profiles.

www.staveapps.com

#### Downloadable SSP

Create a complete SSP in downloadable format that thoroughly documents your organization's information systems, environment and architecture, risk management report and organizational approval process.

# **Cybersecurity Manager Features**

For Authorizing Officials

(858) 925-5780

#### Dashboards

Interactive, role based dashboards available for all parties involved in the RMF process including the Authorizing Official (AO), the Information System Owner (ISO), the Information System Security Officer (ISSO), and Security Control Assessor (SCA).

# Portfolio Management 🖻

Snapshot views and quick access into your portfolio streamlines approving and prioritizing systems and packages to best achieve your organizations strategic goals and objectives.

#### Work Queues

Live work queues provide approving officials with information and prioritization of critical tasks to manage their work directly from their dashboard.

Intelligent workflows provide the ability to prioritize packages based on standardized criteria through the review and approval process.

# **Cybersecurity Manager Features**

For the Cyber Operator

(858) 925-5780

# Reduce Response Time (

Automation of Risk Management Framework (RMF) process reduces your vulnerability response time from days to minutes.

#### Plan Generation

Automate the development of Plan of Action & Milestones (POA&M) complete with tasks and deadlines to assist in your cyber remediation efforts.

#### Audit Trail

All remediation actions are tracked, logged, and made auditable giving your organization complete visibility for historical compliance and baseline measurement.

Ensure Compliance

Generate compliance tasks based on your organization's Security Technical Implementation Guideline (STIG) requirements to ensure your information systems meet the standard. www.staveapps.com
