ImageQuest Pre-Install Checklist (v14.0)

(Please print, fill out, and return this form to the fax #or email address shown at the bottom of the page)

Your Name: _____

Your Company Name: _____

Identify the Operating System for the machine where ImageQuest Server will be installed.

- ☐ Windows Server 2008 R2 SP1
- ☐ Windows Server 2012
- ☐ Windows Server 2012 R2
- ☐ Windows 7
- ☐ Windows 10
- ☐ Other

NOTE: The above Operating Systems are the **only** supported platforms to install ImageQuest server to. If your OS is different, please contact Informa Support. The ImageQuest Server will only install on a 64-bit operating system. **For security and performance reasons, Informa Software does not recommend installing ImageQuest on a Domain Controller. In addition, Microsoft does not recommend installing SQL Server 2005/2008/2012 Express Edition on a domain controller. Support for non-recommended platforms will be provided on a best-effort basis only.**

The machine where ImageQuest Server will be installed meets the minimum hardware/.NET requirements listed below (Check all that apply):

- ☐ 64-bit CPU (multi-core recommended)
- ☐ 2GB of Memory (4GB Recommended)
- ☐ DVD Drive
- ☐ Microsoft .NET 4.0 Full Framework
- ☐ 300MB of Free Hard Drive Space

NOTE: If a firewall is enabled on the ImageQuest Server during the installation, it will be necessary to open TCP ports 32751 and 33176 and UDP port 2112 to allow access to the IQ Services.

WebIQ and/or OXPd (for supported HP MFP devices) both require IIS to be installed. Will IIS be installed on the ImageQuest server?   ☐ Yes   ☐ No

Will ImageQuest be configured to use an existing SQL server (2008/2008 R2/2012/2012/2014)?   ☐ Yes   ☐ No
If "Yes", please check each box below to confirm the requirements are met:

- ☐ A user with SQL Administrator rights will be available throughout the install/upgrade process
- ☐ The full-text search option is installed and enabled on the existing Microsoft SQL Server
- ☐ The full-text search option is installed and enabled on the existing Microsoft SQL Server
- ☐ Mixed mode authentication is enabled

NOTE: If ImageQuest will not use an existing Microsoft SQL Server, Informa Software can provide SQL 2012 Express. This will install to the ImageQuest Server's local drive with a default instance of <LocalMachine>\IMAGEQUEST. Also, a reboot to the server may be required.

Do you have an HP MFP device or 7000n Scanjet that will need to be added to ImageQuest?   ☐ Yes   ☐ No

If "No", what type(s) of scanner(s) will be used with ImageQuest?

_____

_____

NOTE: Please make sure that the scanner(s) are configured to scan images as multi-page tiffs to a network folder and/or have TWAIN drivers installed on a local client pc prior to scheduling your install/upgrade.

The machines where the ImageQuest client will be installed meet the minimum hardware/software requirements listed below (Check all that apply):

- ☐ Windows Vista SP2 ☐ Windows 7 SP1   ☐ Windows 8/8.1 ☐ Windows 10
- ☐ 2GB of Memory ☐ 80MB of free Hard Drive Space ☐ Microsoft .NET version 4.0 Client Profile
- ☐ Adobe Reader 6.0 or higher ☐ Internet Explorer 8 or higher

NOTE: WebIQ clients require Internet Explorer 7.0 or higher.

What version of Microsoft Office is installed on the client machines?

☐ Office 2007 ☐ Office 2010 ☐ Office 2013 ☐ Office 2016
