

Day & Zimmermann has produced and is fully capable of full production of the M87 Volcano Canister Assembly for the US Army, Marines, and other State Department approved customers.

À

**USE:** The Volcano Mine Dispenser provides soldiers with a scatterable mine capability delivered by helicopter or ground vehicle.

**DESCRIPTION:** The Volcano dispenser contains 960 anti-tank/anti-personnel mines and is capable of rapidly laying a minefield 1100 meters long by 120 meters wide. In addition, the mines have a timed self-destruct capability.

The VOLCANO system can be configured as both a heliborne and ground delivered mine system. The M139 mine dispenser, with various adapter kits, is capable of being mounted on UH-60 helicopters and a variety of ground vehicles. The dispenser racks accept and launch mines from the M87 mine canisters which contain five GATOR anti-tank (AT) and one anti-personnel (AP) mine each.
