

M720A1 / M720A2 / M768

Day & Zimmermann produces the M720A1, M720A2, and M768 High Explosive 60mm Mortar Cartridges for the U.S. Military and other State Department approved customers.

USE: The M720A1, M720A2, and M768 High Explosive Cartridges are designed for use with the M224-series 60mm Mortar System. These cartridges are designed to be effective against personnel, bunker and light materiel targets.

DESCRIPTION: The High explosive steel projectiles are loaded with either conventional or IM enhanced explosive. The M720A1 and M720A2 are similar with the exception of the explosive fill. Both feature the M734A1 Multi-Option Fuze, which can be set to function in Proximity, Near Surface Burst, Impact, or Delay Mode. With the exception of fuzeing, the M768 is identical to the M720A1. In lieu of the Multi-Option Fuze, the M768 is fitted with an M783 Point Detonating Fuze.
