

M58 / M59 Mine Clearing Charge

American Ordnance LLC, a company of Day & Zimmermann, produces the M58 & M59 Mine Clearing Charge (MICLIC) for the U.S. Military and other State Department approved customers.

USE: Engineer units employ the MICLIC in response to minefield breaching requirements. It is effective against conventionally fuzed mines and when detonated provides a lane 8 meters by 100 meters. The charge is 350 feet long and contains 5 pounds per linear foot of Comp C-4 explosive.

DESCRIPTION: The M58 and M59 Mine Clearing Linear Charge consists of 700 charge assemblies assembled to a nylon rope. The rope assembly is coiled inside a metal container that can be trailer mounted for transport.

SPECIFICATIONS:

Complete Charge (less rocket):

Type: Mine Clearing
Weight: 2800 lb
Explosive Filler: Comp C-4 (1800 lb)
