SMART START

Smart Start is a beginners plan for fitness that is based on scientific research. Follow this simple approach to guarantee that your first steps to fitness are not your last.

Start Slow– don't push your body too soon. It's ok to stop working out when you've had enough.

Build Gradually– aim toward completing full workouts as your fitness builds.

Mix It Up– mix strength, cardio and flexibility training options and learn what workouts consistently motivate you to get moving.
