ABOUT HENRY

"Maybe it's too late for Silkcards to be your first business card. However, it's likely that they will be your last." -Henry Fan

Twenty years ago I created SILKCARDS to serve an exclusive niche market within the realm of business and plastic cards. We create highly custom and unique business cards that are second to none. With the marketplace being highly priced competitive, we took the road less traveled with a vision to serve those that believe in the impact of unique business cards. I continuously strive to develop new products, new options and new technology to reinvent the business cards every day. From Cold Foil to our famous Silk and Suede layered cards. I continuously strive to improve, invent new materials, textures and manufacturing techniques to ensure we continue to deliver the finest cards in the world.
