Wireless
Inventory PDA

Successful pharmacies rely on RMS.

One of the biggest struggles for a retail pharmacy is keeping tracking of inventory. Accurately maintaining proper inventory levels, minimizing purchasing errors, and eliminating out-of-stocks are a real challenge for a pharmacy and their bottom line. With RMS' wireless inventory PDA, you are able to leverage technology to improve staff efficiency and your store's profitability!

How it Works

RMS' Inventory PDA device, based on the Android OS and utilizing a built-in scanner, allows you to achieve many of the time-consuming chores in today's modern pharmacy, such as scanning merchandise for:

- On-hand inventory counts
- Creating purchase orders
- Receiving your daily orders
- Creating shelf labels or signs
- Promo creation
- Manual inventory adjustments (shrinkage)
- Multi-store transfers
- Line busting by scanning a customer's basket prior to reaching the register
- Real-time price changes

Device Features

- 5 inch HD display utilizing Gorilla(R) Glass
- Industrial design, ergonomic, and robust
- 2D scanner
- Full touch PDA
- Wi-Fi (80211a/b/g/n CCXv4 +MIMO)
- 1GB RAM/8GB Flash

The industry leader in pharmacy point-of-sale innovation.
