

Savvius Spotlight Introductory Offers

FOR A LIMITED TIME ONLY — EXPIRES DECEMBER 15, 2017

When you're responsible for network performance, you need two views at once. A broad view to tell you if there are issues and where. And a targeted view to support taking action right now. Savvius Spotlight™ monitors your network in a revolutionary way, providing real-time actionable visibility even at up to 20 Gbps and a million flows.

Every Savvius Omnipliance Ultra™ includes Spotlight for simultaneous monitoring and packet capture. Spotlight is also available standalone in the Savvius Spotlight Appliance.

If you have Savvius Omnipliance TL, MX, or CX:

Trade in your previous generation Savvius Omnipliance® on a new Savvius Omnipliance Ultra at an introductory price

If you have a competitive monitoring or packet capture device:

Trade in your competitive monitoring or packet capture device on a new Savvius Omnipliance Ultra at an introductory price

If you have Savvius Omnipliance models T300, M200, or C100:

Upgrade to an Omnipliance Ultra at an introductory price

Get a Savvius Spotlight Appliance at a generous discount during this introductory offer

This offer includes 3 years of hardware and software maintenance

About Savvius Spotlight:

- Actionable real-time network visibility for performance monitoring and troubleshooting
- Rapidly identify and solve network performance issues
- Real-time visibility of flows-of-interest for up to 20 Gbps of network traffic
- Flow metrics include network and application latency, TCP, and VoIP quality
- Network mapping in an unlimited hierarchy
- See worst-performing flows globally, in network map segments, or by node
- Get instant visibility into traffic to or from any IP address
- Browser-based view of worst flows by all or individual metrics, flow counts, and flow lists
- Simultaneous packet capture in Omnipliance Ultra
- Tight integration with Omnipeek packet-level analysis software
