

INTRODUCING STORYTELLER 4.2 UPGRADE

Storyteller 4.2 introduces several new features that continue to empower enterprises to accelerate and de-risk solution definition and delivery. The ability to reuse, quickly reconcile, and merge artifacts allows enterprises to gain efficiencies, quality, and agility while also enforcing standards and compliance mandates by creating and maintaining a strategic content library with controls. This release also introduces Document Generation to ensure compliance and Glossary artifacts, dramatically improving how Glossary references are added to promote a common understanding instantly to reinforce stakeholder alignment.

All existing and new assets created in Blueprint can be used in Storyteller — making migration of your users to Storyteller effortless.

With Storyteller, you will have access to a streamlined, intuitive user experience with enhanced functionality, along with the latest innovations and support for additional browsers.

Take advantage of enhanced usability and functionality with the next generation of the Blueprint platform, Storyteller.

In this release, users can depend on Storyteller for the following capabilities.

Authoring

Users can create and edit the following artifact types within a project:

- Actors
- Business process diagrams
- Document artifacts
- Generic diagrams
- Textual requirements
- Collections
- Baselines
- Bulk edit
- Use case diagrams
- Domain diagrams
- UI mockups
- Reuse, including merge and quick reconciliation
- Bulk move (drag and drop)
- Glossary

Users can view the following Blueprint-specific artifacts
[*NOTE: similar artifacts can be created directly in Storyteller]

- Storyboards
- Use case editor

Administration

- User/group management
- Project management

Managing Requirements

- Version history
- View unpublished changes, jobs
- Create and manage traces and relationships
- Flag trace as suspect
- Impact analysis
- Test plan generation
- Trace matrix via Analytics

Collaboration

- Discussions
- Formal reviews with approvals, optional eSignature
- Informal and public reviews
- Review management and metrics
- Follow up reviews
- Document Generation

Integrations

- Export to MS Word and .pdf

When to use Blueprint 10.2

In this current release, users can continue to use Blueprint for:

- Project administration*
- Instance administration*
- Visio import and export
- Advanced artifact search
- Version compare
- Activity center
- Excel Export (List View)

*Legacy admin in Blueprint can be used to configure both Storyteller and Blueprint, however, basic admin operations are available in Storyteller.
