## VAULT AUDIT

Vault Audit allows you to manage your audit and investigations, end-to-end. Plan, scope and manage your audits from the office while utilising mobility in the field to seamlessly complete your requirements.

Capture and mark up images, create scoring systems, track expenses and schedule tasks. Review your progress at any time and customise reports for any audience.

## VAULT CHECK

Manage equipment, site or environment inspections through simple checklists while on site in real time.

Vault Check allows you to schedule inspections, capture photos and videos, sketch and mark up images, and record locations via GPS. Review simple dashboards to see your progress and generate reports.

## VAULT NOTIFY

Record, capture and report on incidents, events or hazards while on site or in the field. Vault Notify gives you the power to manage notifications and take corrective actions in real time, which means you can respond faster, work smarter and be safer.

# CONTRACTOR MANAGEMENT

Vault's Contractor Management System gives you the ability to manage contractors and sub-contractors with consistency and transparency, whether you're in the office or on site.

## PRE QUALIFY CONTRACTORS

Cut down the time-consuming process of finding the right contractors for your project.

- Define your requirements for a project and have contractors qualify themselves to do the work.
- Have selected contractors sign your terms to formalise agreements.

## ONGOING COMPLIANCE

Ensure your contractors meet compliance & regulatory standards.

Contractors can easily access the system to maintain their details so you can be sure that their licenses, qualifications and insurances are all up-to-date.

## ISSUE INDUCTIONS

Communicate easily with your contractors. Ensure consistency in your inductions and other learning requirements via a Learning Management system.

## PROJECT MANAGE WITH FULL VISIBILITY

Never miss a beat in reviewing & monitoring your contractors' work.

- Generate reports on progress, non-conformance and improvements
- Block contractors from access
- Accept and close permits and JSA's.

## KNOW WHEN PEOPLE ARE ALLOWED ON SITE

With a single source of truth, you'll have clearly defined schedules for when people are allowed on site, creating transparency for your project team.

## VAULT LEARNING

**VAULT LEARNING IS AN ONLINE LEARNING MANAGEMENT SYSTEM THAT INTEGRATES SEAMLESSLY WITH YOUR VAULT PLATFORM.**

### **AUTOMATED RECORD KEEPING**

Records of training are automatically updated in Vault's People Module upon completion.

### **CENTRALISED PORTAL**

From inductions, to health & safety, to sales training, house all your training needs in one location.

### **CLOUD BASED**

Training can be completed anytime, anywhere and on any device.

### **MANAGE CONTRACTORS**

Link to Vault Contractor Management to ensure external inductions are completed before Contractors arrive onsite.

### **CUSTOMISABLE**

Build your own training content or engage us to do it for you. Use still images & videos for a more interactive experience.

### **STANDARDISE YOUR TRAINING**

Ensure all your inductions and training are consistent across the organisation.
