## THE FORCES OF AGING WELL

Being a man is full of rewards. It's also full of challenges. At Prairie Naturals, we believe the best investment any man can ever make is to invest in his own health and well-being. Our premium quality men's natural health formulas give you the confidence, vigor and stamina to stand up to life's many changes and challenges.

# ABOUT MEN'S HEALTH

Men have specific health needs and concerns and often ignore health warnings. Unchecked this can lead to a serious deterioration in health and vitality. Even more concerning, men are at higher risk of developing disease and die at higher rates for all the top 10 causes of death including: heart disease, diabetes, liver disease and even cancer. The good news is that many of these hazards can be addressed with preventative lifestyle choices and health promoting daily habits. Prairie Naturals has been a pioneer in men's health products since the early 1990's.

## Hormonal Balance is Key to Male Vitality

The hormone system is complicated and is influenced by several factors. Diet, exercise and supplements aid in managing hormones, especially the production of testosterone. A reduction in testosterone is notable as loss of libido and potency, loss of muscle mass, depression, nervousness, insomnia, fatigue, inability to concentrate, erectile dysfunction, frequency of urination, loss of memory and sweating.

To build testosterone and to manage hormone balance, Robert recommends herbal extracts, minerals and vitamins. Managing testosterone promotes youthful vitality and mitigates the effects of natural aging. Adding supplements to reduce the symptoms of stress, improve sleep and provide nutrition to the endocrine system.

## ROBERT'S TIPS FOR MEN'S HEALTH

- 1** Drink 4 liters (1 liter per 50lbs of body weight) of filtered alkaline water. Optimal hydration flushes toxins and improves all functions of the body. An alkaline host is a primary defense against disease. To further promote an alkaline state, add alkaline forming nutrients like the juice of half a lemon, fermented green foods, organic spirulina and organic chlorella.
- 2** Make a daily commitment to moving my body. I engage in high rep weight training alternating weights with cardio to keep my heart rate up using cardio equipment, stair climbing or body weight squats. Exercise improves our cardiovascular health and aids in stress management. Just 45 minutes of exercise even walking can increase free testosterone by up to 39.6%
- 3** Eat organic and choose nutrient dense superfoods. My kitchen at home and at the office is stocked with organic fruits, vegetable and proteins. Organic food reduces exposure to hormones that imbalance our system.
- 4** Listen to your body. If my body is telling me it is tired, I stop and listen, reset my boundaries, make better food choices and rest my body.
- 5** Poor diet, low levels of testosterone, obesity and many prescription medications can negatively influence male vitality. The good news is that many of these hazards can be addressed with preventative lifestyle choices and daily habits.

# PROST FORCE

## Protect Your Prostate for life!

Most men probably never even think about their prostate gland until they have a feeling that something's "not quite right" but the functioning of this small, donut-shaped muscular gland sure can make a big impact on a guy's life. Just ask any man around the age of 50. That's about the time of life when men start to get personally acquainted with the many unpleasant symptoms of prostate problems.

Prairie Naturals Prost-Force is an evidence based formulation that synergistically combines the key nutritional and phytochemical ingredients researchers recommend for prostate health.

Even younger men need to be pro-active to protect and improve the health of this important gland that, among other things impacts on sexual satisfaction. Don't wait until you have symptoms of a prostate gland in distress. Protect your prostate now and prevent potentially serious problems later with Prairie Naturals Prost-Force.

## Who Needs It?

- Men in the age category of 40 and beyond
- Men looking to start a preventative regime for their prostate health
- Men looking for a drug-free, proven effective, natural supplement for prostate and urinary tract support
- Men wanting restful sleep and fewer bathroom trips at night
- Men looking for erectile dysfunction support

## Prost-Force May Help To:

- Promote healthy prostate function
- Reduce DHT (Dihydrotestosterone) without this negative side effect
- Improve urinary health and reduces frequency of urination
- Reduce the discomfort of prostate enlargement

Pumpkin Seed Oil (Cucurbita pepo) .....	25 mg

# ANDRO FORCE

## Manopause is Real!

Also known as the “low-T phenomenon” where natural testosterone levels begin to drop along with muscle tone, strength and sexual stamina. Testosterone and estrogen levels are a delicate balance in both males and females. Stress, sleep disorders and normal aging are responsible for hormone fluctuations that lead to feeling old and tired. New AndroForce helps your body manage stress and cortisol levels which can aid your hormonal feedback mechanisms to boost testosterone and reduce estrogen levels resulting in a youthful energy.

## Who Needs It?

- Men experiencing andropause symptoms
- Men under high stress
- Men aged 30 plus who want to improve free testosterone

## Andro-Force May Help To:

- Reduce stress
- Increase free testosterone levels
- Decrease estrogen dominance
- Increase overall energy
- Increase sex drive
- Lift mood
- Reduce body fat

## Each softgel capsule contains:

Ashwagandha Root and Leaf extract (8% withanolides)-Sensoril.....	125 mg
Pantothenic Acid (Vitamin B5).....	50 mg
Pyridoxal 5' Phosphate (Vitamin B6).....	25 mg
DIM (3,3 Diindolyl Methane) .....	50 mg
Rhodiola Rosea P.E .....	150 mg
Pumpkin Seed Oil.....	150 mg
Stinging Nettle Root P.E. 4:1 with 1% Beta-sitosterol.....	100 mg

# Z•MAG FORCE

## Supports Testosterone to Improve Sleep & Recovery.

Z•Mag Force is a combination of minerals, delivered in scientifically proven dosages, shown to increase testosterone levels and muscle strength, while also improving sleep. Zinc and magnesium are essential for proper hormonal and immune support. Z•Mag Force contains highly bioavailable forms of zinc and magnesium and P-5-P B6 to further enhance the absorption of zinc and magnesium. With added Holy Basil to aid in adrenal support and hormone balance. Holy Basil helps the body in dealing with the effects of stress and anxiety.

### Who Needs It?

- Men needing to replace critical building blocks of testosterone
- Men wanting to consume these valuable supplements before bed to improve recovery
- Persons who are under increased stress, such as athletes, students and those who are overworked

### Z•Mag Force May Help To:

- Repair deficiencies of zinc, magnesium and B6
- Improve testosterone production
- Maintain proper muscle function
- Reduce muscle cramping
- Reduce fatigue
- Reduce anxiety, depression and induce more restful sleep

### Two v-capsules contain:

Magnesium (L-aspartate, Oxide).....	450 mg
Zinc (L-carnosine) .....	30 mg
Vitamin B6 (Pyridoxal 5'-phosphate) .....	10 mg
Holy basil extract (2.0% Ursolic acid leaf) .....	100 mg

## Commonly Asked Questions About Men's Health Issues

**Question:** What is Benign Prostatic Hyperplasia (BPH) **Answer:** Benign Prostatic Hyperplasia (BPH) afflicts many men as they age. Studies have shown 50% of men between 51-60, and 90% of men over 80 suffer from this benign enlargement of the prostate. [2] While it may be termed benign, it comes with unpleasant side effects such as a frequent urge to urinate, especially at night, and the potential for developing into more serious prostate issues.

**Question:** Why do some men experience a loss of libido? **Answer:** Losing interest in sex affects about 15% to 16% of men, and at least double that many women. The age-related decrease in libido among men is most frequently attributed to a decline in testosterone levels and to changes in receptor site sensitivity to androgen. According to MayoClinic.com, testosterone levels in men peak during the teen and early adult years, then decrease about 1 percent a year after age 30. Diet, exercise, lifestyle factors and supplements can boost natural testosterone production.

# TRIB FORCE

## Adaptogen Blend to Manage Stress.

Prairie Naturals Trib-Force is a blend of 2 powerful adaptogenic botanical extracts, Bulgarian Tribulus and Panax Ginseng. Tribulus terrestris is best known for its ability to promote a healthy libido and increase male energy. Tribulus has a strong anti-stress effect, which in turn helps prevent the over conversion of testosterone into estrogen. Stress and inflammation are the two biggest causes of erectile dysfunction, low testosterone and low energy in men.

Panax ginseng has been shown to reduce arterial stiffness leading to better blood flow in all parts of the male body. Ginseng is recognized as a traditional energy tonic.

## Who Needs It?

- A wide variety of men suffer from low libido and erectile dysfunction for reasons from stress to medical interventions
- Men 40 or older (prevent problems before they start)
- Men who want to increase lean muscle tissue
- Men with high life stress - from work or home
- Men who have had cancer and take medicine to lower their hormones
- Men with low testosterone
- Men who have taken steroids (for medical or sports purposes)

## Trib Force May Help To:

- Promote healthy libido and male energy
- Reduce the effects of stress
- Provides potent antioxidant and anti-inflammatory properties

## Each capsule contains:

Tribulus Terrestris (Tribulus, Whole Plant) Extract..... 500 mg  
Standardized to 45% Saponins.  
Panax ginseng (Korean Ginseng, Root) .....250 mg  
10:1 extract equivalent to 2500 mg of Panax ginseng.  
Standardized to 10% Ginsenosides.

**Question:** I am not even 45 years old but lately I have the urge to urinate much more frequently. Could this be a symptom of a prostate problem? **Answer:** Yes it could be. Frequent or urgent need to urinate is one of the first symptoms. Other symptoms can include: weak urine stream, difficulty starting urination, stopping and starting while urinating, increased frequency of urination at night.

**Question:** My wife says that she has noticed a change (not in a good way) in my sexual energy and stamina. Can stress make a difference in that way? **Answer:** Absolutely! Stress can seriously impact a man's performance. Other things that can affect sexual performance negatively are low levels of testosterone, sub-optimal nutrient intake, diabetes, alcohol, blood pressure, circulation and many prescription medications.

**Question:** I have heard that men go through a kind of change of life similar to a woman going through menopause. Is that true? **Answer:** Yes, it's looking like it is true. Researchers call it andropause and it is defined as the slow but steady reduction in testosterone and other hormone production that occurs with aging. The main symptoms are: loss of libido and potency, depression, nervousness, insomnia, tigue, inability to concentrate, loss of memory and sweating.

# LIFESTYLE HABITS FOR VITALITY AT ANY AGE

Robert Pierce is the President and Owner of Prairie Naturals. Robert is passionate about product formulation and is an expert on male hormonal health, diet and exercise. Now in his sixties, Robert remains committed to a lifestyle promoting well-being.

***“So many people spend their health gaining wealth, and then have to spend their wealth to regain their health.”***

A.J. Reb Materi.

## Healthy Ways to Please Your Prostate

- Eat cooked tomatoes several times a week. Lycopene, one of the phytochemicals in tomatoes and watermelon, reduces the risk of prostate cancer.
- Use herbs and spices - especially garlic, oregano, rosemary and cinnamon to boost the antioxidant content of meals.
- Eat nuts and seeds. Pumpkin seeds, sesame seeds and ground flax seeds are especially good for prostate health.
- Eliminate or reduce coffee. Drink more water. Drinking green tea boosts your body's cancer-fighting antioxidants.
- Add fermented soy foods to your diet.
- Limit dairy foods. Milk products are suspected of increasing the potential for prostate cancer.
- Dose up on Vitamin D3. Exciting new research is showing that Vitamin D reduces prostate cancer risk.
- Go green. Cruciferous veggies prevent prostate cancer. Eat broccoli, cauliflower, Brussels sprouts, kale, cabbage, collard greens, kohlrabi, mustard, rutabaga, turnips, bok choy, Chinese cabbage and arugula.
- Go blue. Research shows that blueberries inhibit the growth of prostate cancer cells.
- Sexercise. Add more sex and exercise to your life.
