

DUAL PRODUCT SYSTEM

WE'VE NEVER KILLED A FISH!

Clean Water.
Naturally.

Description

HaloKlear's All-Natural Water Treatment System

The **Dual Product System (DPS)** is quickly gaining national and international recognition as the premier all-natural stormwater treatment solution, providing unparalleled performance and reliable results in an array of projects across the globe. **HaloKlear DPS** uses biodegradable, natural flocculants that perform on a wide array of soil types and pH ranges. In contrast to other products on the market, the HaloKlear Dual Product System creates dense flocs with great shear strength and a low water content that settle very quickly. Solids can be efficiently removed from the water column – increasing performance and productivity while keeping costs low. In addition, **HaloKlear DPS** is extremely flexible with a successful track record in active, passive, and semi-passive deployment.

GREEN FOR LESS

Don't just clean the water, clean the environment

Our chemistries are less toxic when water is returned to its natural environment. All of HaloKlear's products exhibit exceptionally low toxicity, and the **Dual Product System** has been proven to have zero toxicity.* No bioaccumulation concerns exist when and where HaloKlear products are used, and our products are 100% biodegradable through enzymatic activity.

* Third-party toxicity testing concluded that no fish were killed by the Dual Product System (DPS) when both parts were used in combination of following Best Management Practices.

Product Benefits

- **Biodegradable natural flocculants**
- **Effective on a wide range of pH conditions and soil types**
- **Functions in active, semi-passive and passive applications**
- **Effective in fresh water and salt water**
- **Works with existing equipment of a part of a customized product**
- **Capable of trapping hydrocarbons, metals and nutrients**
- **Increases performance and productivity while keeping costs low**
- **Traceable with HaloKlear's Residual Test Kit**

Part One

LBP-2101 = Liquid
DBP-2100 = Dry socks

Part Two

LiquiFloc = Liquid
GelFloc = Dry socks
