Preparing

The best thing about it
is the anticipation

Our preparation tip

Creamy fruit butter cream

.....
Fruit butter cream comes out best if you heat the finely puréed berries in the microwave for a short period of time (4-5 seconds).

You have the best ideas. You can already see everything in front of you. The anticipation is palpable. But first there's the preparation. Measuring, weighing, scraping, rolling, brushing. Don't worry. We know exactly what you want. And we have everything you may need to prepare your miracles, both large and small.

Tipp

Getting the right temperature is key.

.....
When preparing butter cream all the ingredients should be at room temperature to ensure they combine well.
.....

Dough in top form

Sweet baking

A cake says more than a thousand words

Our preparation tip

Tips for cutting cakes

You should cut cakes, pastries and rolls with slow cutting movements, because simply pressing from above can destroy the shape of your creation. If you want to cut slices that are all the same size it is best to use a so-called cake divider. (p.53)

Fairy tales begin with "Once upon a time...". Recipes with "Take...". And a passion for baking with the words "With KAISER..." – wherever your creativeness may take you: springform pans, heart-shaped pans or bundt cake pans, cake pops, muffins or whoopie pies. Whether you fancy a cake, a creative donut or a trendy push-up cake.

Decorating and serving

Of course it's possible – and much more besides

Our decoration tip

Butter cream decor with shadow effect

.....
Pipe spots onto your cake using the icing bag (round nozzle) and pull the spot to one side with the appropriate tool. Give the cream a slightly darker tint after every round.

How great it would be to be able to say, "That's exactly how I imagined it!" more and more often. When you decorate and serve with KAISER products you can do everything you thought was impossible before. Give everything you bake its own unique look. Give every cake its own unmistakeable style. And put the cherry on top of every baking idea.

Our tip

Whether you're looking to add cream rosettes, writing or imaginative designs – decorating flans and cakes is child's play with the right decorating supplies. For creamy toppings and borders, you're best using an icing bag or a cream syringe; a decorating pen is ideal for fine writing and designs.

Our work tip

Break up chocolate

Break the chocolate into small pieces to ensure it melts evenly. The smaller the pieces, the faster they melt.
