

## Risk, Security and Privacy Portfolio

You are under great pressure to secure your organization. But at the same time, security can't slow the business down. Online's Risk, Security and Privacy solutions portfolio is built to help you achieve that goal.

We work collaboratively with you to gain a strong understanding of your business model, critical data flows and repositories, network architecture, and systems that support the business. This deep understanding enables us to align our solutions and recommendations to ensure you are meeting commercial and regulatory obligations. Our security experts work with you to ensure your data, systems and applications are protected against threats and vulnerabilities.

Online's Risk, Security and Privacy portfolio of services offers solutions to address the full lifecycle of information security and risk management needs. Our security professionals work with you every step of the way to design the right solution for your organization.

## Why Online for security?

As a leader, you are responsible for enabling business to continue while protecting your organization from rapidly evolving cyber threats. At Online, we work with leaders to help them manage security risk based on the unique needs of their organization. We strive to create an environment where business can be transacted seamlessly, conveniently, and securely.

Online delivers balanced and realistic security solutions to clients across North America. As threats evolve faster than ever, we remain focused on providing you with actionable solutions to ensure you can grow your business without constraints, integrating security into your daily operations.

### Expertise & Certifications

Our security consulting team has decades of experience and are certified with the following:

- > Certificate of Cloud Security Knowledge (CCSK v3)
- > Certified Information Privacy Professional (CIPP)
- > Certified Information Systems Auditor (CISA)
- > Certified Information Security Manager (CISM)
- > Certified Information Systems Security Professional (CISSP)
- > Certified in Risk and Information Systems Control (CRISC)

- > Payment Card Industry Qualified Security Assessor (PCI QSA)
- > Project Management Professional Certification (PMP)

We have been the trusted advisor to hundreds of businesses during Mergers and Acquisitions (M&A) activity, changes in technology, changing regulations, and the constantly evolving threat landscape. As one of the Best Workplaces in Canada, Online places great focus on the professional development of our team. You can be assured that our security consultants are among the most knowledgeable in the industry.

### Focused on security

We believe that compliance is the product of good security. Therefore, we collaborate closely with you to gain a strong understanding of your business model, critical data flows and repositories, network architecture, and systems that support the business. This heightened understanding puts us in a position to make recommendations that align with your business, culture, people, and technologies. We work closely with you to perform a root cause analysis for any issues to determine the best means for remediation. The end result is better security and business-aligned compliance.
