

THE OPALQM DIFFERENCE

The OpalQM quality and curriculum management system is the only solution that truly solves the curriculum governance needs of today's medical schools. We achieve this by providing a single **integrated workflow, custom reports and analytics, and a solution tailored specifically for your school.**

Integrated Workflow

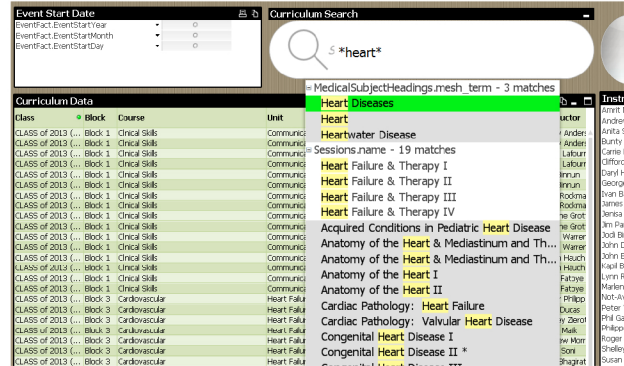

Seventy-seven percent of schools changing curriculum management systems cited usability issues in their decision to change. OpalQM is an **integrated solution** which allows you to seamlessly move from one tool to another, without having to log in again or enter data in multiple places.

You can go to one place to see the tasks you need to perform, quickly execute them, and move on.

Custom Reports and Analytics

You need complete information about your curriculum. OpalQM's reporting module provides you with a package of reports plus the ability to write your own queries to extract any information you need from your curriculum management system to help you meet accreditation needs and to ensure the quality of your education program.

A Custom Tailored Solution for your School

OpalQM's "Custom Off-the-Shelf" model provides the **best of both worlds**, balancing the **customization** of Do-It-Yourself with the **reuse** of Commercial Curriculum Management Systems. Our model tailors OpalQM to meet the specific needs of your school. We can do this because Online Business Systems is a business and IT consulting firm with over 250 employees across North America, delivering innovative solutions for our clients for 25 years.

"OpalQM is successful at the University of Manitoba because academically and administratively, it provides support for the highest standard of education, evaluation and reporting aligned with LCME accreditation standards. Students, faculty and staff were all quick to embrace the ease of use and breadth of features."

- Dr. Dean Sandham,
Former Dean of Medicine
