

CRITICAL INFORMATION SUMMARY

INFORMATION ABOUT THE SERVICE

SERVICE DESCRIPTION and KEY INFORMATION

BusinessCom NBN Broadband provides asymmetrical high speed internet access via the National Broadband Network, and comes with a static IP address and a monthly included data allowance. You can choose to have your speed reduced (shaped) to 256kbps once you have used up all your included allowance or you can continue using the service at the same speed and pay excess data charges of \$3.30 per GB. There are no peak or off peak restrictions on your use.

INSTALLATION and HARDWARE REQUIREMENTS

If your service connection is non standard, NBN Co will discuss any additional charges with you and these charges will appear on your first bill. You will require a suitable router at your premises for this service to work. If required, we can provide you with our Home Network Gateway for self-installation at no cost. Additional charges apply for on-site Home Network Gateway installation and replacement. We will deliver your service to the Network Boundary Point at your premises, which is defined as the physical port or 'UNI' on the NBN Network Termination Unit or Port on the Home Network Gateway if selected. The cabling that is required in your premises beyond the Network Boundary Point is your cost and responsibility, as is the provision of a suitable 240V AC power outlet. Please contact our Customer Service Team for further information. If your premises are rented, you must obtain the consent of the property owner to have the NBN installation performed.

IMPORTANT CONDITIONS REGARDING SPEED

Interface speeds refer to the speed of the technology installed at your premises. They are not necessarily equivalent to the download/upload speeds you will achieve in practice. Actual speeds will be affected by many external factors which include the number of end-users using the service at the same time, the hardware, the software and software configuration, the connection method within the premises and the type/source of content being downloaded. In the case of NBN connections delivered using FTTN (Fibre to the Node) technology, the distance you are away from the node will affect maximum available speeds. In Fixed Wireless coverage areas, only the 25/5Mbps option is available.

MINIMUM TERM and CONNECTION CHARGES

Minimum term is 12 Months. Standard installation is included at no charge if the service is to be connected in an existing developed area and we can arrange the required installation appointments for you. If you need a first connection in a newly developed area, NBN Co will levy a charge of \$300 Inc GST and this will appear on your first bill.

SERVICE AVAILABILITY

The service is subject to NBN availability in your local area. To check availability please [CLICK HERE](#) or contact our Customer Service Team.

UPGRADES and PLAN CHANGES

Once you take up a phone and broadband service on the NBN you can't move back to services on the existing copper network. You may upgrade your bandwidth or your plan allowance once per month. You cannot downgrade your bandwidth or plan while within contract term. Requests to increase the connection speed will result in a restart of the 12 month term. Requests to decrease the connection speed will result in a cancellation of the existing service and Early Termination Charges will apply.

EARLY TERMINATION CHARGE

If you cancel your service within the minimum term, you will be charged an Early Termination Fee (ETF). The ETF will be calculated as your monthly access fee multiplied by the months remaining in your minimum term.
