

## Making the Move to Sprint Hi-Speed Ethernet Painless

### Customers Need High-Speed Connectivity

Enterprises demand fast, reliable, secure data connections at every location. Sprint Ethernet Services is the preferred method for Sprint and local service providers to deliver reliable, scalable high-bandwidth connectivity.

### But There Are Challenges to Getting Service

If Ethernet Site Readiness is badly managed, it can lead to revisits, inadequate site preparation, and delay of service switch-on. This is because the End User Customer Requirements (EUCRs) that must be delivered to provide service are outside the experience of most customers.

Without the experience to anticipate issues and prevent delays, avoidable obstacles can frustrate customers and make the path to Ethernet expensive and disruptive. For these reasons, customers should work with a proven Sprint Ethernet site readiness partner.

### We Get You There – Faster and Better

We work with Sprint and local service providers every day to rapidly connect customers to service. Concert has the knowledge and the skills to mitigate Ethernet deployment issues and their associated cost. A Concert Registered Telecommunications Project Manager (RTPM) manages each Carrier Ethernet job and knows exactly how to coordinate between stakeholders.

### The Process

We do a site survey to build the EUCRs, then we look for ways to reduce cost and accelerate the install. Once the scope of work is agreed, we manage the entire project, keeping everyone advised of project status the whole way.

### Services We Offer

- ☛ [Turnkey Ethernet Site Preparation](#) with LEC Validation of Requirements
- ☛ Includes Inside/Outside Plant (ISP/OSP) installations
- ☛ Includes Power Outlet and Grounding installations
- ☛ Includes Inner Duct and Backboard installations

### Benefits of Our Approach

- ☛ 100% managed [Sprint Ethernet site preparation](#)
- ☛ Over 335,000 rollouts delivered
- ☛ Accelerated, reliable site preparation
- ☛ Minimize site visits and cost
- ☛ Meet all Sprint readiness requirements
- ☛ Consistent communication with all parties
- ☛ Local Techs in all US states and 165 countries
