

Remote working productivity.

Let's embrace this new reality. We can help you get your remote working journey started.

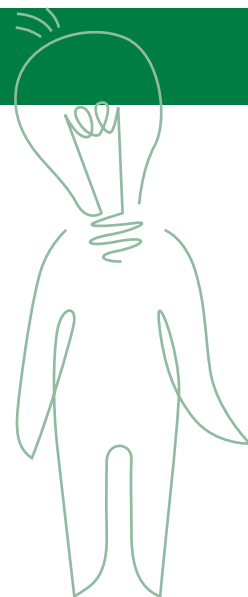

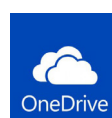

Collaboration.

Teamwork hub in Microsoft 365: collaboration essentials

Get a hub for teamwork where you can chat, hold meetings, and share files and apps. Connect your people to their content with file storage and sharing, cloud note taking and planning tools.

What we'll do:

- Consultation call / meeting
- Obtain access to the Microsoft 365 environment
- Create the required Teams channels (1-2)
 1. Set tabs for files, calendar, planner and OneNote
 2. Create an example 'Meeting Agenda' in OneNote
 3. Create some example 'Meeting Actions' in Planner
 4. Setup additional tabs to link in other files, folders or other apps, like Trello and Excel
- Setup link from the Teams channel to the OneDrive/SharePoint libraries
- Demonstrate to key staff and consult on any further requirements
- Apply any further customisations required
- Deliver a training session and provide access to an online knowledge base

DELIVERY TIME:

2 days

COST (AUD):

Starting from **4k**

Move your phone system to the cloud with Teams

Enable your staff to take calls from their landline at home in their computers and mobiles. If you already have MS Teams, we can transfer your landline to Teams and enable chat, meetings, files and phones all in one place. Never miss a call!

DELIVERY TIME:

5 days

COST (AUD):

Starting from **6k**

Bundle: Teamwork hub in Microsoft 365 with cloud phone system

Get the hub for teamwork and integrate your phone system so you don't miss any type of communication! Enable your staff to take calls from their landline at home in any device, and have chat, meetings, files and phones all in one place.

Microsoft Partner

Cloud Productivity

Add-on: work from home IT support or App support

Need more help? No problems. You can purchase block of hours for support or engage in ongoing remote support for your staff.

Document management.

Cloud Document Management in Microsoft 365 - SharePoint

Online document storage and sharing tool that allows you to create and amplify value from your content everywhere in its lifecycle. Share, discuss, and co-author documents using groups and metadata. Deliver intuitive user experiences that make it easy to find, edit, and manage content in document libraries.

What we'll do:

- Consultation call / meeting
- Prepare, demonstrate & approve proposed document structure with key stakeholders
- Setup the Microsoft 365 SharePoint tenancy
- Setup 2-3 document libraries in SharePoint
 1. Setup first level folder structure
 2. Setup permission and restrictions where required
- Provide instructions for client to move all data to the SharePoint document libraries (option for Bremmar to migrate all data if desired)
- Verify PC's can now access the data from the SharePoint cloud and function correctly
- Demonstrate and train the champion users

Add-ons:

- Workflows and approvals
- Integrations with other apps, such as Power BI, PowerApps and Teams
- Metadata
- Customised document libraries
- SharePoint end-user support
- Training (end user, admin, IT, champion user)
