

Imagine your organisation becoming more efficient and competitive.

Notice how your dream is cloud shaped?

Introducing Microsoft Content Services, a customisable cloud-based platform that integrates all your documents, teams and more.

Technology was meant to help us. But it actually hinders your business if people can't quickly find what they're looking for, don't have remote or mobile device access to files, can't work on the same files at the same time, or don't know if they have the right version of an important document.

At Bremmar, we work hard to make your work easier. We can show you how a new Microsoft Content Services platform can make your organisation more productive, more collaborative and more competitive.

“ **BREMMAR**
Working hard to make
your work easier

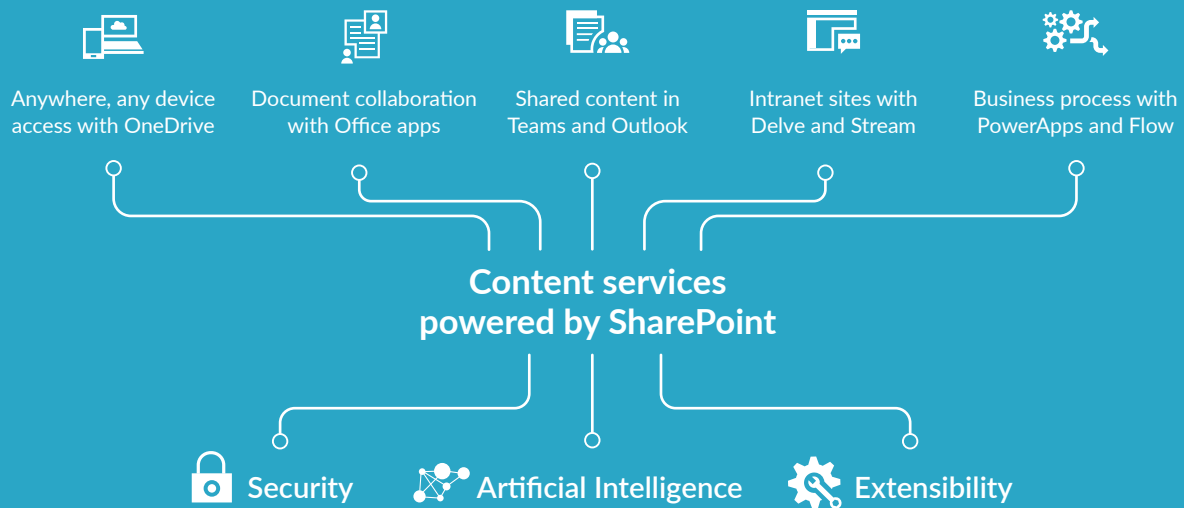

Microsoft Content Services. The dream toolkit for a **seamless** working environment.

SharePoint acts as the ring master to enable cloud-based collaboration and intuitive secure document management across every part of your business.

All industries are under pressure to make efficiencies and streamline processes. The Microsoft Content Services platform is a key tool to bring digital transformation to your workforce.

It's a highly advanced engine room that connects all of your familiar Office 365 programs with One Drive cloud storage, intuitive searching and document management, plus next-generation intelligence to automate everyday processes. Of course, Microsoft gives you enterprise level security, scalability and reliability.

The diagram below shows how all the powerful tools work seamlessly together.

Become more productive, more collaborative, and more competitive.

- Streamlined workflows
 - Quicker, more informed decisions
 - Better control over sensitive information
 - Faster content delivery
 - Intuitive access and sharing controls
- Better communications
 - More control
 - Greater agility
 - Better employee experience

Bremmar are your local Microsoft experts. Let's talk.

Our SharePoint Implementation Expert can consult on your requirements, help you with a business case, prepare a project implementation plan, and manage installation and training.
