

# Want to build amazing web and mobile apps?

TraknProtect is a real-time location technology & analytics platform that allows hotels to integrate & harness the power of location data into their safety & operations systems.

## Overview

We are looking for a **Full Stack Engineer**, full time and on-site that can work closely with our CTO and existing team. We are a quickly growing organization with the opportunity to make a huge impact and to build the next generation of hotel technology.

## Position Duties

As a full stack engineer, we expect for you to help in all areas of our tech stack as the need arises.

Primary areas of work include but are not limited to:

- Front end web and mobile development
- API development and integrations
- Data processing script development
- Database modifications

## Desired Skills

- 3+ years engineering and software development background
- Basic HTML/CS/JS knowledge
- Excellent PHP experience
- Mobile app development (Ionic framework ideal)
- Understand OOP and MVM design patterns for PHP
- SQL & MySQL experience
- Hands on experience with Linux server systems
- **Bonus points** for .NET & Adobe CC

## How to apply?

Send an email to [tom@traknprotect](mailto:tom@traknprotect) with the subject "Full Stack Engineer Application 2018" Be sure to include a link to your LinkedIn and Github profiles. Also, please answer the following question: "Where was your best stay at a hotel and why?"

## Some of our tech stack
