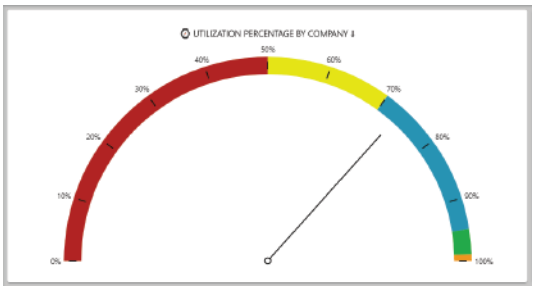
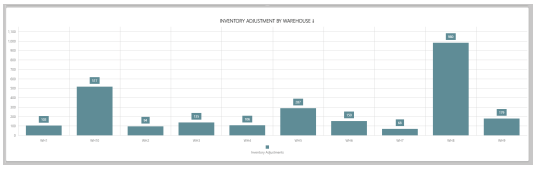
Rebus Data Services

Demand More From Your Data

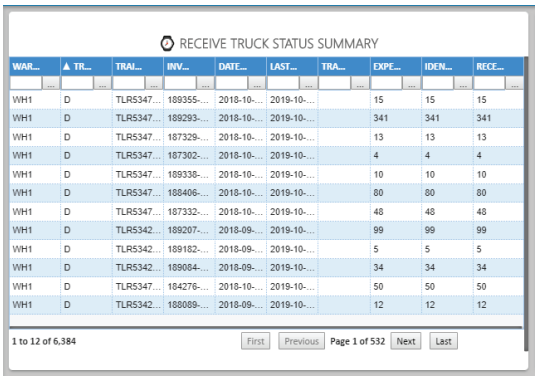
Lost in Big Data? Is your corporate strategy not yielding results? Are your generic BI tools not built for your operation? Focus on the right data, the "Smart Data", with Rebus© Data Services.



Analytics has become a complicated business with too many data sources, millions of data points, and constant new data being developed every second of every day at an exhausting rates. Trying to manage all the data and pull out valuable insights is a chanllenge. Rebus can help.



Rebus is a revolutionary SaaS-based data services platform which aggregates and hormonizes your logistics data from any supply chain execution software. Rebus looks at the logistics data points across your operation, so you can easily create visualizations to show the cross-functional KPIs that matter most to your business.



Discovery Big Insights with KPIs Tracking in Real-Time

You already own all the data you need, now you can harvest the big insights you want by focusing on the relevant data. Rebus enables you to spot trends, anomalies, and more with KPIs tracking in real-time.

Make Faster Data-Based Decisions to Maximize Efficiency and Profitability

Using a solution built by logistics professionals for logistics professionals makes pulling the key information needed to make important decisions simple. Faster data-based decisions will help eliminate inefficiencies and maximize profitability across the supply chain.

Empower All Users with an Intuitive Interface Built for Logistics Professionals

Rebus features everything you need in one place to run your operations. From a drag and drop interface for building dashboards and widgets to the Microsoft© 365 and Sype™ integrations, all users are empowered to pull and share data without needing an IT background.

Scale with Your Supply Chain

Rebus© is a cloud-based solution with no cost per user, no painful upgrades, no expensive fees, and no headaches. Connect additional supply chain software or additional sites and get more insights!
